What if a Richter 15 earthquake hit New York City? Are fire tornadoes possible? His responses are masterpieces of clarity and wit, gleefully and accurately explaining everything from the relativistic effects of a baseball pitched at near the speed of light to the many horrible ways you could die while building a periodic table out of all the actual elements. The book features new and never before answered questions along with the most popular answers from the xkcd website. - New Text design is more visually appealing and more effective in communicating core concepts of geology to students.
- New Geology at a Glance features use flow charts, figures, and photos to visually summarise difficult concepts in a succinct manner, recognising that many students are visual learners.
- New Coverage of Earth Systems is integrated throughout the text.
- New Highlights Boxes which link applications of the geology being studied to situations that are recognisable to students are now categorised as Environmental Earth System Science or Application/Everyday Interest and have been substantially revised.
