Housing First Ending Homelessness Transforming Systems And Changing Lives:

Housing First Deborah Padgett, Benjamin F. Henwood, Sam J. Homelessness is on the increase in most European states and remains at stubbornly high levels across developed nations This is despite increased policy attention economic provision and the implementation of strategies that have promised to stop homelessness in its tracks rather than simply manage the crisis Providing an in depth exploration of the experiences of Ireland Denmark and Finland in their various initiatives designed to end homelessness this book presents an authoritative comparative account of policies and strategies that have worked along with an exposition of those that have not Making an invaluable and timely contribution to the current debate it provides essential policy lessons for the multiple jurisdictions seeking to successfully bring homelessness to an end **Reshaping the World** Ernesto Castañeda, 2021-03-16 This volume

provides information and analyses to better grasp the social implications of geographical borders as well as the individuals who travel between them and those who live in border regions Sociologists anthropologists philosophers linguists and scholars of international relations and public health are just some of the authors contributing to *Rethinking Borders* The diversity in the authors disciplines and the topics they focus on exemplify the intricacies of borders and their manifold effects This openness to so many schools of thought stands in contrast to the solidification of stricter borders across the globe The contributions range from case studies of migrants sense of belonging and safety to theoretical discussions about migration and globalization from empirical studies about immigrant practices and exclusionary laws to ethical concerns about the benefits of inclusion It is timely that this collective work is published in the middle of a pandemic that has affected every single part of the world Unprecedented border closures and stringent travel restrictions have not been enough to contain the virus entirely As COVID 19 shows diseases ideas and xenophobic and racist discourses know no borders Plans that transcend borders are vital when dealing with global threats such as climate change and pandemics *Homelessness and Social Work*

Carole Zufferey, 2016-11-25 Drawing on intersectional theorising *Homelessness and Social Work* highlights the diversities and complexities of homelessness and social work research policy and practice It invites social work students practitioners policy makers and academics to re examine the subject by exploring how homelessness and social work are constituted through intersecting and unequal power relations The causes of homelessness are frequently associated with individualist explanations without examining the broader political and intersecting social inequalities that shape how social problems such as homelessness are constructed and responded to by social workers In reflecting on factors such as Indigeneity race ethnicity gender class age sexuality ability and other markers of identity the author seeks to construct a new intersectional

Utopian Thinking and Social Work Chris Horsell, 2025-02-03 This book highlights the importance of employing imaginative sensibilities to thinking and action in social work and social policy practice Exploring the question of how ideas about utopia and utopian method can be used in social work practice and policy practice to address social inequalities it shows that central to this critique is the argument that contemporary social policy responses and subsequent social work interventions to a range of policy problems e.g homelessness poverty family violence need to acknowledge the failure of dominant neoliberal discourses in addressing these issues The COVID 19 pandemic has highlighted and in many ways exacerbated existing inequalities and the post pandemic future provides opportunities to put utopian ideas into action Showing how utopian thinking can challenge fundamental assumptions regarding welfare dependency and unitary identities in policy settings this book will be of interest to all scholars students and professionals working in social work and social policy

Welfare Conditionality Beth Watts, Suzanne Fitzpatrick, 2018-05-15 Welfare conditionality has become an idea of global significance in recent years A hot topic in North America Australia and across Europe it has been linked to austerity politics and the rise of foodbanks and destitution In the Global South where publicly funded welfare protection systems are often absent conditional approaches have become a key tool employed by organisations pursuing human development goals The essence of welfare conditionality lies in requirements for people to behave in prescribed ways in order to access cash

benefits or other welfare support These conditions are typically enforced through benefit sanctions of various kinds reflecting a new vision of welfare focused more on promoting pro social behaviour than on protecting people against classic social risks like unemployment This new book in Routledge s Key Ideas series charts the rise of behavioural conditionality in welfare systems across the globe its appeal to politicians of Right and Left and its application to a growing range of social problems Crucially it explores why in the context of widespread use of conditional approaches as well as apparently strong public support both the efficacy and the ethics of welfare conditionality remain so controversial As such Welfare Conditionality is essential reading for students researchers and commentators in social and public policy as well as those designing and implementing welfare policies
