How Skin Bacteria Created The Image On The Shroud Of Turin:

How Skin Bacteria Created the Image on the Shroud of Turin Stephen Mattingly, 2015-05-07 The hypothesis is that bacteria from the skin of Jesus grew at unusually high levels during his crucifixion and left their excess on the linen surface after the Shroud was removed from the body Everything that occurred during the crucifixion was essential to producing his image on the Shroud All the pieces had to fall in place at just the right time Science and Scripture agree beautifully with the crucifixion of Jesus They seamlessly weave their combined data points into the linen fabric that we know as the Shroud of Turin *The Crucifixion of Jesus, Completely Revised and Expanded* Frederick T. Zugibe, 2005-04 A detailed analysis on Christ's death by a forensic pathologist and medical examiner from the crown of thorns to the burial tomb incorporates the latest scientific discoveries regarding the Shroud of Turin and its authenticity

A Chemist's Perspective On The Shroud of Turin Raymond N. Rogers, 2008-07-14 Raymond N Rogers was the head of the chemistry experiments for the Shroud of Turin Research Project STURP the team of 24 researchers that performed the first ever in depth scientific examination of the relic in 1978 He was a professional chemist for 52 years and spent 35 years as a research chemist at Los Alamos National Laboratory until his retirement in 1988 Rogers shares his frank and often unvarnished personal perspectives on his 30 year involvement in Shroud studies He details his own research and backs it up with solid observations chemical analysis and microscopy He provides us with his own theory of the Shroud's image formation and his own opinion on its authenticity He discusses the role of religion and science and how each has impacted Shroud research Most importantly he discusses the possible future for the Shroud itself Rogers unique perspective straightforward style and in depth knowledge will both inform and enlighten you Includes 68 Color and B W Illustrations *Resurrection of the Shroud* Mark Antonacci, 2001-08-30 This book scientifically challenges earlier radiocarbon testing and presents new evidence in determining the Shroud of Turin's true age

The DNA of God Leoncio A. Garza-Valdes, 2012-05-09 In 1988 radiocarbon dating showed that the Shroud of Turin long regarded as the burial cloth of Jesus of Nazareth could not be from the time of Jesus but was of a more recent origin What scientists did not know at that time but what author Dr Leoncio Garza Valdes came to discover is that bacteria produce an organic coating what he calls a bioplastic coating over time on ancient textiles including the Shroud itself This coating which the author first discovered on Mayan artifacts so distorts the carbon dating process that objects on which it is found such as the Shroud are actually significantly older than the data show The scientific community has hailed Dr Garza Valdes's findings since this new knowledge is of significance for archaeologists around the world For those interested in the mysterious history of the Shroud it is again possible to regard this artifact as originating in the first century and consequently as being the burial cloth of Jesus But Dr Garza Valdes's amazing discoveries did not end with this breakthrough His examination of pieces of the Shroud under a microscope has revealed incredible clues consistent with the Scriptural accounts of the death of Jesus Bacteria that produce acetic acid vinegar were isolated from the

Shroud Do they belong to the vinegar offered to Jesus before his death on the cross Could human blood remnants that contain a man's DNA be traces of the blood of Jesus Does it contain the DNA of God The DNA of God is the fascinating story of this microbiologist's journey of discovery and of the earthshaking secrets he has revealed about the Shroud of Turin
