Clinical Interest of Steroid Hormone Receptors in Breast Cancer G. Leclercq, S. Toma, R. Paridaens, J. C. Heuson, 2012-12-06 Several papers dealing with the clinical relevance of steroid hormone receptors in breast cancer have already been published However no publication has overviewed studies currently being conducted in Europe nor is there a register of the european centers performing receptor assays It has been our purpose to fill these gaps A large majority of authors who we contacted kindly agreed to contribute to our book Papers were grouped into six main parts according to their contents The abundance of clinical data relevant to receptor assays led us to add critical summaries to help the reader to form his own opinions on the subject We would like to thank Drs R J B King G Contesso L Santi and E Engelsman who helped us in this regard We hope that this book will enable the reader to become acquainted with the present state of European steroid hormone receptor studies devoted to breast cancer treatment We also hope that it will promote cooperation between European oncologists involved in this field of research

LHRH and Its Analogs B.H. Vickery,J.J. Nestor,E.S. Hafez,2012-12-06 A CORBIN Investigations on LHRH and its analogs have just completed their first decade We have witnessed a veritable explosion of chemical physiologic and pharmacologic data on this hypothalamic peptide and the approximately 1500 agonist and antagonist analogs that have been synthesized In order to track this expanding field I was asked to organize an international symposium on basic and clinical aspects of LHRH analogs as part of the Reproductive Health Care CDS Symposium held in Maui Hawaii in October 1982 This meeting brought together a number of the leading investigators in the field Much new state of the art information was presented which I and my colleagues felt deserved a wider audience Drs Vickery Nestor and Hafez consented to undertake this task Upon review of the literature it was apparent that there was no recent text which fully covered the breadth of developments in the field Accordingly the editors decided to use the symposium as a nucleus on which to build a singular comprehensive state of the art analysis of this rapidly growing discipline and the application of such knowledge to reproductive medicine As exemplified by the various areas of expertise provided by the individual contributors it becomes obvious that the scope of the subject matter while relating solely to a well defined chemical class LHRH analogs and a circumscribed physiologic and pharmacologic entity reproduction has expanded enormously
