Dobb's Journal that the decision to use tables as the primary data structure for Lua has been influenced by LISP and Scheme. This is because these languages had lists as their data structure mechanism which is single and global in nature. Scheme has had increasing influence on the semantics of Lua with the passage of time. This influence can be evidently seen with the inclusion of full lexical scoping and anonymous functions in the language. The release of versions of Lua up till version 5.0 was made under a license that was similar to the BSD license. Afterwards MIT license was used to make releases. This was applicable from the release of version 5.0.
