The Geek Gap Bill Pfleging, 2009-12-02 The Geek Gap is thoroughly original, virtually unique, of paramount importance, and on top of ALL that, a great read. Bill Pfleging and Minda Zetlin deserve a giant hat off for this wonderful piece of work. Tom Peters' Business managers, suits, and technology professionals: geeks have become warring camps in too many companies. While both groups have no trouble following the lingo of their own specialties, when they have to communicate with each other, neither side fully understands or wants to understand the other. And that's a big problem in an increasingly technology-dependent business environment where success depends on the smooth integration of both business savvy and technological expertise. Bill Pfleging, a respected computer and Web consultant, and Minda Zetlin, a veteran business writer, explore in this insightful, witty, and very instructive book the culture clash that pervades nearly every business-technology interaction. The Geek Gap provides members of both camps a practical guide to working together effectively. Using many real-world examples, the authors vividly illustrate the consequences in time, money, careers, and even lives when these separate cultures fail to communicate. By far the most serious example was the Challenger space shuttle disaster, which was likely the direct result of an internal clash and lack of communication between NASA's managers and engineers. The authors provide practical solutions for building trust between business and computer professionals. The book is filled with tips aimed at geeks and suits to help each group understand the other, communicate in what amounts to a foreign language, and get what they need to do their jobs effectively. The authors profile companies and individual executives who have successfully bridged the gap by conducting events that bring the two groups together, switching jobs from one area to the other, creating whole new careers, and much, much more. This is the first book to directly address issues of communication and understanding between business and technology people. The Geek Gap, in identifying this problem and providing numerous practical and workable solutions, is an indispensable guide for all. Bill Pfleging, Woodstock, NY, is a computer and Web consultant who writes a regular technology column for the Woodstock Times. With computer experience going back to the early 1970s at IBM, he has also worked for Tripod.com and Lycos Network. Minda Zetlin, Woodstock, NY, is a longtime business writer whose work has appeared in Crain's New York Business, Success, Management Review, and other publications. She is also the author of *Telecommuting for Dummies* and co-author of *The ASJA Guide to Freelance Writing*.

Bounce! Barry J. Moltz, 2008-03-31 Conventional business wisdom tells you that there's always something to learn from failure. Not true, says Barry Moltz. Sometimes failure just stinks. Bounce explains how success and failure are simply normal outcomes in the regular lifecycle of a business, and that process over the long term matters far more than individual outcomes. This book shows you how to build a business that can bounce through these cycles for long-term success. If you run a business, better make it Bounce.

Born, Not Made James L. Fisher, James V. Koch, 2008-09-30 Books magazine articles and educational programs on entrepreneurship are all based on the idea that anyone can be an entrepreneur; that entrepreneurs are made, not born. Well, maybe not. In a study of 234 CEOs funded by the

Kauffman Foundation James L Fisher and James V Koch came up with a surprising conclusion Some individuals are simply more naturally fitted to become entrepreneurs than others They are pre wired Because of heredity some people are much more likely to become successful entrepreneurs or pursue entrepreneurial strategies within a corporate setting profitably By recognizing that this book will significantly improve corporate selection processes strengthen entrepreneurship programs and boost the confidence of aspiring entrepreneurs through invaluable insights Among other things Fisher and Koch show that true entrepreneurs not only see the world differently they act differently Compared with corporate managers for example they are more confident more decisive more likely to upset the apple cart and more energetic They love to compete but are notable for the partnerships they are able to fashion with friend and foe alike Such conclusions are remarkable Why Because they are based on the only empirical comparison study yet conducted on entrepreneurship The insights are not based on personal opinion or case studies but on valid and reliable personality indicators Because the book shows that certain kinds of people will find it much easier to found successful companies than others it has many practical applications It will help organizations fit the right people into jobs requiring an entrepreneurial bent It will challenge corporations to hire entrepreneurial CEOs who will transform businesses rather than maintain the status quo And it will speak directly to entrepreneurs and those contemplating starting a business who will learn if they have the right stuff to start and sustain a business In short this book provides insights into the entrepreneurial soul that can change the fortunes of individuals and companies for the better
