Hacking With Swift Project 17 Swifty Ninja

Paul Hudson

Hacking With Swift Project 17 Swifty Ninja:

Hacking with Swift Paul Hudson, 2017-04-08 HACKING WITH SWIFT Get started coding server side Swift by making a website using templates and routing CouchDB Poll Learn how to build a voting API using CouchDB and JSON Routing Route web requests the smart way with route chaining and regular expressions Swift Fan Club Build your own forum website while learning about CouchDB views sessions and encryption Meme Machine Learn how to process image uploads and work with the filesystem Templates Take a tour around the advanced features of the Stencil template engine Barkr Build a microblogging API using MySQL and token based authentication ASCII art Learn to fetch and manipulate remote data and serve the results using ajax Databases Discover how MySQL can help keep your data organized efficient and safe InstantCoder Add GitHub authentication to your site and let Kitura do all the hard work AppleFanatic Build your own CMS with multiple Kitura servers Markdown support and more Testing Learn how XCTest can help validate your back end APIs in seconds While building projects you ll learn all this and more How to transfer your existing Swift knowledge to the server Connecting to databases to read and write data using CouchDB and MySQL Creating server side sessions for temporary storage Building reusable templates to separate your presentation from your logic How to design build and test web APIs for your Swift apps Authenticating users to create login screens You ll also learn some HTML JavaScript and SQL along the way as part of the Swift projects Server Side Swift follows the same approach I used with Hacking with Swift small standalone projects that teach individual techniques starting from scratch so you end up with a huge library of finished projects you can develop further or use as the base for something entirely new Which framework is used Now for the answer to a question you ve probably been asking the book uses IBM s Kitura framework for server side Swift That s not an accident Apple introduced Kitura at WWDC 2016 It s rare to see third parties speak at WWDC but IBM and Apple formed a close partnership to help drive Swift adoption forward and Kitura is part of that IBM is putting huge resources behind the platform and probably has the highest concentration of Swift developers outside of Cupertino Kitura out performs Vapor in benchmarks including having significantly lower memory usage and latency Most importantly Kitura is very similar to Express js which is a massively popular development framework for JavaScript This lets existing web developers migrate to Swift more easily Even if Kitura isn t your preferred choice the Swift Server APIs work group are looking at ways to build shared APIs for standard server functionality so hopefully you ll learn lots of transferrable skills

Immerse yourself in the artistry of words with Crafted by is expressive creation, Immerse Yourself in **Hacking With Swift Project 17 Swifty Ninja** . This ebook, presented in a PDF format (Download in PDF: *), is a masterpiece that goes beyond conventional storytelling. Indulge your senses in prose, poetry, and knowledge.
