Meteorology! Unable to Prevent Climate Change and World Wars? Arnd Bernaerts,2012 The Second World War stands
for the criminal madness of German Nazi government Less known is their responsibility for the only climatic shift from warm
to cold in an otherwise constantly warming world over the last 150 years Not knowing the reason for the biggest climatic
shift since industrialization which started in winter 1939 40 rectifies to speak about failures of meteorology Only four months
into Second World War Northern Europe experienced the coldest winter in 100 years The reason plain physics Naval war in
Northern European seas released the summer heat too quickly Polar air got free access to Europe The same applies to the
second and third war winter Europe was back in the Little Ice Age After Japan attacked Pearl Harbor on Dec 7th 1941 naval
war became a global affair In close conformity with naval war in European seas and subsequently in the Pacific a pronounced
global cooling took place which lasted until about the mid 1970s Furthermore a thorough research of strong warming in the
Northern Hemisphere from winter 1918 19 to winter 1939 40 would have revealed a convincing link to naval war in Europe
from 1914 to 1918 But climatology does not care The connection between two naval wars and two climatic changes within 25
years has not yet been investigated and explained If they had warned governments about the threat of climate change as
their successors currently do with the greenhouse effect naval activities in two World Wars may have been prevented or at
least been limited Claims to understand climate should be regarded as a failure as long as meteorology is unable to explain
the two most pronounced climatic shifts during the last century and the role two world wars had in this game These two
events would show that the oceans have a dominate role in the climate system and man is able to change its direction by
intensive activities in the marine environment It took four months to generate the extreme regional winter 19 **Northwest**
