Robert Worley, 2011-12-08 After four decades of relative stability in national security strategy American behavior has been erratic in search of a new and sustainable role on the world stage Rather than facing an ideologically driven great power alliance the new threat appears to be emanating from failed or failing states And rather than preparing to deter and if necessary defeat a military super power the United States has entered into long costly and uncertain nation building efforts that are falling out of favor with the American public facing a deep recession Nation building efforts in Iraq and Afghanistan have exposed an imbalance in the capabilities of the departments and agencies and an inability to achieve a unity of effort a whole of government effort High level commissions recommend a reallocation of resources to achieve a new balance in the instruments of power and major reorganizations to affect a better orchestration of the instruments Others are completely redefining national security Traditionally threats to national security were military problems with military solutions What were considered issues of foreign policy including pandemics and environmental degradation are increasingly cast as national security matters They are not military problems with military solutions A national security strategy aligns ends ways and means Finding a new alignment must take place in an environment of a deep and wide recession partisan gridlock and uncertainty about the very meaning of national security This book presents the reader with the information necessary to engage in an informed debate on national security strategy and the system that supports it [American Journey Online User's Guide](#) Mary Ann Heiss, 2003 *Grand Strategy in Theory and Practice* William C. Battleground Daron R. Shaw, Scott L. Althaus, Costas Panagopoulos, 2024 Covering the beginning of the television era to the present Battleground provides an unprecedented look at the Electoral College strategies used by US presidential campaigns from 1952 to 2020 and what difference they make on election day Although US presidential campaigns are among the most closely followed events in the world academic research tends to conclude that they are much less important for shaping election day outcomes than broader economic conditions and more gradual socio political trends If so then what campaigners do and say might be entertaining but should rarely have a decisive influence on who wins the White House Yet because academic studies typically treat presidential elections as singular events there is surprisingly little research that considers the strategies that parties pursue in presidential campaigning across multiple election years how those strategies have evolved over time or what difference those strategies might make on election day Drawing on internal campaign records and novel data sources covering every presidential election from 1952 through 2020 Battleground identifies the Electoral College strategies for every major presidential campaign in the modern era assesses how well they executed their plans and illuminates what difference their state by state allocation of candidate visits and television spending made on election day From Eisenhower to Trump Daron R Shaw Scott Althaus and Costas Panagopoulos show how battleground states have been selected and contested and why campaign strategies are important for shaping Electoral College outcomes They find that presidential campaigns in the modern era have been consistently strategic sophisticated and effective As a result campaign strategies can still be pivotal for shaping Electoral College outcomes even if their influence looks somewhat different today than in 1952 Battleground provides readers with a sophisticated yet straightforward look at how and how much presidential campaigns affect the selection of the most powerful person in the world
