GETTING STARTED
Before you begin your workout, it is important to warm up your muscles. This can be done by performing light cardio for 5-10 minutes. Once you are warmed up, you can begin your workout. Start with a few sets of each exercise, and then increase the weight as you become more comfortable. Remember to always use proper form, and to breathe correctly. If you are unsure of how to perform an exercise, consult the manual or ask a fitness professional for assistance.

SAFETY PRECAUTIONS
Always use proper form and technique when performing exercises. Do not lift weights that are too heavy for you. If you feel any pain or discomfort, stop the exercise immediately. It is also important to stay hydrated during your workout. Drink plenty of water before, during, and after your exercise routine. Finally, make sure you are using the equipment correctly. Read the manual carefully and ask for help if you need it.
