Computers in Education Arthur Tatnall, Bill Davey, 2014-05-05 This book is a collection of refereed invited papers on the history of computing in education from the 1970s to the mid 1990s presenting a social history of the introduction and early use of computers in schools The 30 papers deal with the introduction of computer in schools in many countries around the world Norway South Africa UK Canada Australia USA Finland Chile The Netherlands New Zealand Spain Ireland Israel and Poland The authors are not professional historians but rather people who as teachers students or researchers were involved in this history and they narrate their experiences from a personal perspective offering fascinating stories *A People's History of Computing in the United States* Joy Lisi Rankin, 2018-10-08 Does Silicon Valley deserve all the credit for digital creativity and social media Joy Rankin questions this triumphalism by revisiting a pre PC time when schools were not the last stop for mature consumer technologies but flourishing sites of innovative collaboration when users taught computers and visionaries dreamed of networked access for all *A Short History of Computing* A. J. Sly, 1976 *History of Computing in the Twentieth Century* Nicholas Metropolis, 2014-06-28 *History of Computing in the Twentieth Century* *History of Computing in Education* John Impagliazzo, John A. N. Lee, 2004 **How Computers Entered the Classroom, 1960-2000** Carmen Flury, Michael Geiss, 2023-06-19 In the history of education the question of how computers were introduced into European classrooms has so far been largely neglected This edited volume strives to address this gap The contributions shed light on the computerization of education from a historical perspective by attending closely to the different actors involved such as politicians computer manufacturers teachers and students political rationales and ideologies as well as financial political or organizational structures and relations The case studies highlight differences in political and economic power as well as in ideological reasoning and the priorities set by different stakeholders in the process of introducing computers into education However the contributions also demonstrate that simple cold war narratives fail to capture the complex dynamics and entanglements in the history of computers as an educational technology and a subject taught in schools The edited volume thus provides a comprehensive historical understanding of the role of education in an emerging digital society *History of Computing in Education*, 2011 *A History of Modern Computing, second edition* Paul E. Ceruzzi, 2003-04-08 From the first digital computer to the dot com crash a story of individuals institutions and the forces that led to a series of dramatic transformations This engaging history covers modern computing from the development of the first electronic digital computer through the dot com crash The author concentrates on five key moments of transition the transformation of the computer in the late 1940s from a specialized scientific instrument to a commercial product the emergence of small systems in the late 1960s the beginning of personal computing in the 1970s the spread of networking after 1985 and in a chapter written for this edition the period 1995 2001 The new material focuses on the Microsoft antitrust suit the rise and fall of the dot coms and the advent of open source software particularly Linux Within the chronological narrative the book traces several overlapping threads the evolution of the computer's internal design the effect of economic trends and the Cold War

the long term role of IBM as a player and as a target for upstart entrepreneurs the growth of software from a hidden element to a major character in the story of computing and the recurring issue of the place of information and computing in a democratic society The focus is on the United States though Europe and Japan enter the story at crucial points on computing per se rather than on applications such as artificial intelligence and on systems that were sold commercially and installed in quantities
