infused in just about every discussion and serve to amplify organizational expectations of IT. In this environment IT departments have to retool, rethink and revise their way of operating. Few have the option of starting from scratch; the vast majority of organizations have built IT functions over decades. Now it's time to remodel and renovate for the future. This book walks the reader through the process of determining what type of IT function they have today and what they'll need tomorrow. It discusses how to assess and analyze IT capabilities and then develop and implement a plan to renovate in place. By retooling now, the IT function can successfully meet the growing demands of the organization in the future. When approached in a planful manner, this process of renovating can energize the entire organization and help foster innovation and transformation along the way.

Performance Measurement and Incentive Systems in Purchasing Erik Hofmann, Daniel Maucher, Martin Kotula, Oliver Kreienbrink, 2013-10-01 In recent years, purchasing performance measurement has steadily gained in importance in theory and practice. Yet in many cases, the focus still remains on cost items, especially savings. Moreover, reported performance ratios in purchasing are frequently called into question in terms of their amount and efficacy. Most of the time, there is no tie-in at all with staff compensations. To meet these and other challenges, this book presents a holistic approach for purchasing performance measurement and the incentive systems associated with it. The following topics are dealt with in detail: Purchasing performance measurement on the level of commodity groups and the procurement organization; Supplier evaluation and performance measurement on the level of the buyer-supplier relationship; Comprehensive systems for purchasing performance measurement such as the procurement value added and the purchasing balanced scorecard; Performance-oriented incentive systems and bonus payments for buyers, procurement organizations and suppliers. Readers are thus provided with comprehensive guidelines for the implementation and realization of sustained performance measurement and incentivization in purchasing.

Bring Your Own Device Security Policy Compliance Framework Rathika Palanisamy, Azah Anir Norman, Miss Laiha Mat Kiah, Tutut Herawan, 2025-03-29

Proliferation of Bring Your Own Device BYOD has instigated a widespread change fast outpacing the security strategies deployed by organizations The influx of these devices has created information security challenges within organizations further exacerbated with employees' inconsistent adherence with BYOD security policy To prevent information security breaches compliance with BYOD security policy and procedures is vital This book aims to investigate the factors that determine employees' BYOD security policy compliance by using mixed methods approach Security policy compliance factors BYOD practices and security risks were identified following a systematic review approach Building on Organizational Control Theory Security Culture and Social Cognitive Theory a research framework positing a set of plausible factors determining BYOD security policy compliance was developed Next with a purposive sample of eight information security experts from selected public sector organizations interviews and BYOD risk assessments analysis were performed to furnish in depth insights into BYOD risks its impact on organizations and recommend control measures to overcome them This led to the suggestion of four control measures to mitigate critical BYOD security risks such as Security Training and Awareness SETA policy top management commitment and technical countermeasures The control measures were mapped into the research framework to be tested in the following quantitative phase The proposed research framework was tested using survey results from 346 employees of three Critical National Information Infrastructure CNII agencies Using Partial Least Squares Structural Equation Modelling PLS SEM the framework's validity and reliability were evaluated and hypotheses were tested Findings show that perceived mandatoriness self efficacy and psychological ownership are influential in predicting employees' BYOD security policy compliance Specification of security policy is associated with perceived mandatoriness while BYOD IT support and SETA are significant towards self efficacy Unexpectedly security culture has been found to have no significant relationship to BYOD security policy compliance Theoretical practical and

methodological contributions were discussed and suggestions for future research were recommended. The analysis led to a number of insightful findings that contribute to the literature and the management which are predominantly centered on traditional computing. In view of the ever increasing BYOD threats to the security of government information it is imperative that IT managers establish and implement effective policies to protect vital information assets. Consequently the findings of this study may benefit policymakers particularly in the public sector in their efforts to increase BYOD security policy compliance among employees.

Sustainability Management Handbook Shirley J. Hansen, James W. Brown, 2020-12-17 A strong sustainability program requires leadership to draw on a solid knowledge base, manage resources wisely, identify sustainability opportunities, make difficult choices and accept the challenge to lead, influence and persuade colleagues.
