Aluminum-Lithium Alloys N Eswara Prasad, Amol

Gokhale, R.J. H Wanhill, 2013-09-20 Because lithium is the least dense elemental metal materials scientists and engineers have been working for decades to develop a commercially viable aluminum lithium Al Li alloy that would be even lighter and stiffer than other aluminum alloys The first two generations of Al Li alloys tended to suffer from several problems including poor ductility and fracture toughness unreliable properties fatigue and fracture resistance and unreliable corrosion resistance Now new third generation Al Li alloys with significantly reduced lithium content and other improvements are promising a revival for Al Li applications in modern aircraft and aerospace vehicles Over the last few years these newer Al Li alloys have attracted increasing global interest for widespread applications in the aerospace industry largely because of soaring fuel costs and the development of a new generation of civil and military aircraft This contributed book featuring many of the top researchers in the field is the first up to date international reference for Al Li material research alloy development structural design and aerospace systems engineering Provides a complete treatment of the new generation of low density AL Li alloys including microstructure mechanical behavior processing and applications Covers the history of earlier generation AL Li alloys their basic problems why they were never widely used and why the new third generation Al Li alloys could eventually replace not only traditional aluminum alloys but more expensive composite materials Contains two full chapters devoted to applications in the aircraft and aerospace fields where the lighter stronger Al Li alloys mean better performing more fuel efficient aircraft

Aluminum-Lithium Alloys N.J.H. Holroyd, G.M. Scamans, R.C. Newman, A.K. Vasudevan, 2013-09-20 Industrial interest in wrought heat treatable aluminium lithium Al Li based alloys dates back to around 1919 in Germany However the exploitation of these alloys has historically been limited by their mechanical property anisotropy and concerns over their localized corrosion resistance and temperature stability Recently in the last ten years alloy and process development has resulted in alloy compositions and thermomechanical treatments that potentially can overcome these issues To put these developments in perspective we have reviewed the corrosion characteristics of first second and third generation alloys with an emphasis on localized corrosion intergranular and exfoliation and stress corrosion cracking SCC Intergranular corrosion susceptibility of Al Li Cu and Al Li Cu Mg alloys increases with copper content and the depth of attack increases with ageing i.e. UAPA 30 mm further analysis of corrosion test results is required

Materials F.R. Fickett, Richard P. Reed, 2013-06-29 The ninth International Cryogenic Materials Conference ICMC was held on the campus of the University of Alabama at Huntsville UAH in collaboration with the Cryogenic Engineering Conference CEC on June 11 14 1991 The continuing bond between these two major conferences in the field of cryogenics is indicative of the extreme interdependence of their subject matter The major purpose of the conference is sharing of the latest advances in low temperature materials science and technology However the many side benefits which accrue when this many experts gather such as identification of new research areas formation of new collaborations which often cross the boundaries of both scientific discipline and politics and a chance for those new to the field to meet the old timers may override the stated purpose This 1991 ICMC was chaired by F R Fickett of the National Institute of Standards and Technology K T Hartwig of Texas A M served as Program Chairman with the assistance of eleven other Program Committee members We especially appreciate the contributions of the CEC board and its Conference Chairman J Hendricks of Alabama Cryogenic Engineering to the organization of this joint conference UAH hosted the conference The local arrangements and management under the watchful eye of Ann Yelle and Mary Beth Magathan of the UAH conference staff were excellent Participation in the CEC ICMC continues to exceed expectations with 650 registrants for the combined conference
