knowledge and perspectives of Indigenous peoples this work delivers a more nuanced ethical and decolonising approach to issues arising from relationships with wilderness Such a collection is immediately appropriate given the political challenges and social complexities of our time and the mounting threats to life across the globe The abiding and uniting logic of the book is to offer a unique and innovative contribution to engender transformations of wilderness scholarship activism and conservation policy This text refutes the inherent privileging and exclusionary tactics of dominant modes of enquiry that too often serve to silence non human and contrary positions It reveals a multi faceted and contingent wilderness alive with agency diversity and possibility This book will be of great interest to students and scholars of conservation environmental and natural resource management Indigenous studies and environmental policy and planning It will also be of interest to practitioners policymakers and NGOs involved in conservation protected environments and environmental governance
