*The Teacher's Guide to Media Literacy* Cyndy Scheibe, Faith Rogow, 2012 A Deeper Sense of Literacy is the first book to suggest that media literacy is both a content area and an approach to teaching that can be integrated into any subject area It combines theory and practical application in a way that addresses the most important questions related to media literacy in education today what is it why is it important how can you teach it across a wide range of curriculum areas and grade levels and does it work Rather than focusing on how to teach media literacy Scheibe and Rogow focus on actually using media literacy to teach lessons across the content areas *Ecocomposition* Christian R. Weisser, Sidney I. Dobrin, 2012-02-01

*Ecocomposition* examines current trends in universities toward more environmentally sound work explores the intersections between composition research that is discourse studies and ecostudies and offers possible pedagogies for the composition classroom Never before have the intersections between ecotheory and composition studies in theory and pedagogy been addressed in this much depth or detail As universities become increasingly concerned with issues of the environment within academic disciplines across the spectrum this book brings together a diverse group of prominent voices to discuss the development of ecocomposition and its possibilities and to argue for a greening of composition studies through which to engage the world in which we live **Ecohydrology & Hydrobiology**, 2005 The international journal *Ecohydrology* targets ecological principle necessity of enhancing ecosystem absorbing capacity and ecosystem services and management tool ecological engineering the use of ecosystem properties for regulation the interplay between hydrology and biota The journal encourages the submission of manuscripts which adopt an integrative approach to aquatic sciences explaining ecological and hydrological processes at a river basin scale or propose practical applications of this knowledge It will also consider papers in other hydrobiological fields Especially welcome are papers on regulatory mechanism within biocenosis and the resistance and resilience of freshwater and coastal zones ecosystems There is no page charge for published papers All submitted papers written exclusively in English should be original works unpublished and not under consideration for publication elsewhere All papers are peer reviewed The following types of papers are considered for publication in *E H* original research papers invited or submitted review papers short communications **Cinematic Howling** Hoi Cheu, 2010-10-01 *Cinematic Howling*

presents a refreshingly unorthodox framework for feminist film studies Instead of criticizing mainstream movies from feminist perspectives Hoi Cheu focuses on women's filmmaking itself Integrating systems theory and feminist aesthetics in his close readings of films and screenplays by women he considers how women engage the process of storytelling in cinema The importance of these films he argues is not merely that they reflect women's perceptions but that they have the power to reframe experiences and consequently to transform life A major contribution to feminist scholarship that will appeal to scholars of both gender and film *Cinematic Howling* is written in an approachable and inviting style full of vivid examples and attention to detail which will suit both undergraduate and graduate courses in gender film and cultural studies **Oswaal**

**Shakespeare, St Paul, and Dramatic Emancipation** Randall Martin,2025-09-04 Shakespeare St Paul and Dramatic Emancipation Disability Gender Race Ecology breaks new ground by revealing the playwright s dramatic reinvention of early modern Pauline texts and paratexts in a wide range of plays Their common thread is Pauline allusive characters who resist political social and or physical subjection and aspire with mixed degrees of failure and success to emancipated lives of fulfilled being and belonging Historically contextualized case studies of Henry VI Part Three and Richard III Twelfth Night The Comedy of Errors Pericles The Winter s Tale The Tempest and King John explore desires for freedom on authorial and theatrical as well as thematic levels They seek out new critical directions by bringing post typological and postsecular Pauline Shakespeare into conversation with contemporary theories of disability gender race and ecocriticism A further original feature of the book is intertextual attention to parallel critical approaches to St Paul by several early modern women writers Shakespeare St Paul and Dramatic Emancipation rediscovers a polyvocal complex and emancipatory Paul as a significant career long resource for the playwright s innovative characterization and dramaturgy

The Natural History of Weasels and Stoats Carolyn M. King,Roger A. Powell,2006-10-12 Field naturalists have observed the activities of weasels for centuries Their descriptions were often accurate but sometimes misinterpreted the animals behaviors and underlying explanations for those behaviors Organized natural history became one of the roots of the science of ecology in the 1920s and by the 1960s scientists had begun to study the biology of weasels with all the critical objective advantages of modern theory and equipment Until the first edition of this book appeared in 1989 no one had attempted to explain these results to non specialist naturalists Now thoroughly revised this book will continue to be the main one stop reference for professionals But both kinds of knowledge are brought together here observations for the traditional naturalist and rigorous measurements and interpretations for modern scientists integrated into a single readable

account This new edition provides a comprehensive summary of the extensive advances over the last 15 years in our knowledge of these fascinating animals A new U S based co author reshapes the content to be more U S centric Stories about North America trappers and backwoodsmen interacting with weasels replace some not all of the previous stories about English gamekeepers These changes permeate the book so readers familiar with the first edition will recognize some material but will find a lot that is new Much less reliable European information quoted in the first edition was there at the time when no better information was available Now a new NZ chapter focuses on predation problems of the species introduced to that country This edition much more than a simple update is now truly an international treatment and a more valuable resource

Francis, 2013-12-03 Much of the evolutionary biology that has grabbed headlines in recent years has sprung from the efforts of sociobiologists and evolutionary psychologists to explain sexual features and behavior even differences between how men and women think as evolutionary adaptations They have looked to the forces of natural selection to explain everything from the mimicry of male mockingbirds to female orgasms among humans In this controversial book Richard Francis argues that the utility of this approach is greatly exaggerated He proposes instead a powerful alternative rooted in the latest findings in evolutionary biology as well as research on the workings of our brains genes and hormones Exploring various sexual phenomena Francis exposes fundamental defects in sociobiology and evolutionary psychology which he traces to their misguided emphasis on why questions at the expense of how questions Francis contends that this preoccupation with why questions such as Why won't men ask for directions results in a paranoid mindset and distorted evolutionary explanations His alternative framework entails a broader conception of what constitutes an evolutionary explanation one in which both evolutionary history as embodied in the tree of life and developmental processes are brought to the foreground This alternative framework is also better grounded in basic biology Deeply learned consistently persuasive and always engaging this book is a welcome antidote to simplistic sociobiological exegeses of animal and human behavior **Narnia and the Fields of Arbol** Matthew Dickerson, David O'Hara, 2008-12-19 An exploration of

the Chronicles of Narnia and the Space Trilogy that enriches our understanding of how to care for our world Alan Jacobs author of *Breaking Bread with the Dead* In *Narnia and the Fields of Arbol* The Environmental Vision of C S Lewis authors Matthew Dickerson and David O Hara illuminate an important yet overlooked aspect of the author s visionary work They go beyond traditional theological discussions of Lewis s writing to investigate themes of sustainability stewardship of natural resources and humanity s relationship to wilderness The authors examine the environmental and ecological underpinnings of Lewis s work by exploring his best known works of fantasy including the seven books of the Chronicles of Narnia and the three novels collectively referred to as the Space Trilogy Taken together these works reveal Lewis s enduring environmental concerns and Dickerson and O Hara offer a new understanding of his pioneering style of fiction *Narnia and the Fields of Arbol* the first book length work on the subject finds the author s legacy to have as much in common with the agrarian environmentalism of Wendell Berry as it does with the fantasy of J R R Tolkien In an era of increasing concern about deforestation climate change and other environmental issues Lewis s work remains as pertinent as ever The widespread adaption of his work in film lends credence to the author s staying power as an influential voice in both fantastical fiction and environmental literature With *Narnia and the Fields of Arbol* Dickerson and O Hara have written a timely work of scholarship that offers a fresh perspective on one of the most celebrated authors in literary history Both revelatory and a pleasure to read Robert Siegel award winning author of *The Whalesong Trilogy*     **The Radiant Hour** Neil Campbell,2000     **Marine Fisheries Review** ,1988
