Equity, Efficiency and Evolutionary Stability in Bargaining Games with Joint Production Manfred Königstein, 2012-12-06 Result 1 10 Simple equity standards were superior to more complex ones even though the latter might be economically more relevant Result 1 11 Equity based on quantity input and return output was most successful and

received a hit rate of almost 1 within a range of 10% i.e. within a distance of 5% of the predicted share Result 1.12 A substantial share of observations is consistent with egalitarian considerations 1.7 Summary The study investigates the predictive power of equity theory and strategic concepts within ultimatum bargaining with advance production This is different from many other experimental studies on non-cooperative bargaining games since usually the resource to be distributed between the subjects is given by the experimenter Here the pie is produced via joint production effort This scenario is more general than bargaining without production and we think it is more natural as well The description of the raw data showed that the production choices are considerably dispersed but nevertheless systematically biased toward the respective player's efficient production level The distributions of demanded return shares and demanded surplus shares partly replicated findings of other studies namely a low percentage of high demands and a considerable proportion of equal surplus splits But they also indicate that advance production compared to no production should be considered an important treatment in studies on ultimatum bargaining Trends in game meat hygiene P. Paulsen, A. Bauer, F.J.M.

Smulders, 2023-08-07 Game meat previously often considered as an exotic food or being relevant only in remote regions is becoming increasingly popular In order to provide sufficient quantities of nutritious wholesome and safe game meat a number of measures have to be implemented along the food chain from the forest field or fenced area where the animals are harvested to the point of consumption These involve monitoring and control of diseases of game animals transmissible to man technology and hygiene of game meat processing and specifics of products manufactured from game meat This book combines 30 contributions of various experts in the field addressing four main topics i.e. hygiene and management of microbial contamination in fresh meat from game zoonoses and epidemiology risk assessment and quality assurance along the game meat chain and quality issues in game meat products The focus on Europe is expanded by presenting specifics of the game meat chain in African and Asian regions with a view to provide information on bushmeat consumed by the indigenous population Similar to the first volume in this series this volume follows a from forest to fork approach and is targeted at scientists in academia and industry graduate students as well as at governmental officials in veterinary public health and food safety **Radical Solutions and eLearning** Daniel Burgos, 2020-05-22 Educational Technology is the right couple to a radical innovation Thanks to the appropriate technology in the right context with the best fit to the target audience education can be drastically improved meaning a better performance competence achievement match with the user's expectations and with the market needs Serious games Virtual reality Augmented reality Remote labs Online learning Blockchain Mobile learning and many other key technologies allow for a better explanation of so many subjects and even more for a complete student involvement and a full teacher engagement into the educational system Technology gives another angle to the same content provides the user with a personalised experience and pushes the limits of knowledge a little further every time This book presents a number of radical innovations through technology from experienced cases
