Routledge Handbook on Jerusalem Suleiman A. Mourad, Naomi Koltun-Fromm, Bedross Der Matossian, 2018-10-26 Few cities around the world transcend their physical boundaries the way Jerusalem does As the spiritual capital of monotheism Jerusalem has ancient roots and legacies that have imposed themselves on its inhabitants throughout the centuries In modern times and aside from all the religious complexities Jerusalem has become enmeshed in the Palestinian and Israeli national identities and political aspirations which have involved and dragged into the fray other actors from around the world Consisting of 35 chapters from leading specialists the Routledge Handbook on Jerusalem provides a broad spectrum of studies related to the city and its history

Beginning with a historical overview starting from the end of the Bronze age the chapters go on to look at a range of topics including religious symbolism and pilgrimage religious and social relations social and economic history architecture and archaeology maps eschatology politics By bringing together contributions from leading scholars of different disciplines this Handbook provides a comprehensive overview of the various layers that make up this unique and special city It will appeal to students and scholars of Middle East Studies religion and cultural history and anyone with an interest in learning more about Jerusalem

Urban Geopolitics Jonathan Rokem, Camillo Boano, 2017-08-21 In the last decade a new wave of urban research has emerged putting comparative perspectives back on the urban studies agenda However this research is frequently based on similar case studies on a few selected cities in America and Europe and all too often focus on the abstract city level with marginal attention given to particular local contexts Moving away from loosely defined urban theories and contexts this book argues it is time to start learning from and compare across different contested cities It questions the long standing Euro centric academic knowledge production that is prevalent in urban studies and planning research This book brings together a diverse range of international case studies from Latin America South and South East Asia Eastern Europe Africa and the Middle East to offer an in depth understanding of the worldwide contested nature of cities in a wide range of local contexts It suggests an urban ontology that moves beyond the urban West and North as well as adding a comparative relational understanding of the contested nature that Southern cities are developing This timely contribution is essential reading for those working in the fields of human geography urban studies planning politics area studies and sociology

Private Communities and Urban Governance Amnon Lehavi, 2016-07-01 This book offers an interdisciplinary and comparative study of the complex interplay between private versus public forms of organization and governance in urban residential developments Bringing together top experts from numerous disciplines including law economics geography political science sociology and planning this book identifies the current trends in constructing the physical economic and social infrastructure of residential communities across the world It challenges much of the conventional wisdom about the division of labor between market driven private action and public policy in regulating residential developments and the urban space and offers a new research agenda for dealing with the future of cities in the twenty first century It represents a unique ongoing academic dialogue between the members of an exceptional group of scholars underscoring the essentially of an interdisciplinary and comparative approach to the study of private communities and urban governance As such the book will appeal to a broad audience consisting of policy makers practitioners scholars and students across the world especially in developing countries and transitional and emerging economies

Beyond Gated Communities Samer Bagaeen, Ola Uduku, 2015-06-12 Research on gated communities is moving away from the hard concept of a gated community to the more fluid one of urban gating The latter allows communities to be viewed through a new lens of soft boundaries modern communication and networks of influence The book written by an international team of experts

builds on the research of Bagaeen and Uduku's previous edited publication *Gated Communities* Routledge 2010 and relates recent events to trends in urban research showing how the discussion has moved from privatised to newly collectivised spaces which have been the focal point for events such as the Occupy London movement and the Arab Spring. Communities are now more mobilised and connected than ever and *Beyond Gated Communities* shows how neighbourhoods can become part of a global network beyond their own gates. With chapters on Australia, Canada, Europe, South America, Asia, Africa and the Middle East, this is a truly international resource for scholars and students of urban studies interested in this dynamic growing area of research.

City of Song Michael A. Figueroa, 2022. Modern Jerusalem, a city central to Jewish, Muslim and Christian religious imaginaries and the political epicenter of the Israeli-Palestinian crisis, is to put it mildly a highly contested space. More surprising perhaps is that its musical landscape not only reflects these rifts but also helped to define them as the ancient city transitioned to modernity during the twentieth century. In *City of Song: Music and the Making of Modern Jerusalem*, author Michael A. Figueroa argues that musical renderings of Jerusalem have been critical to the formation of Israeli political consciousness. The book demonstrates how Israeli songwriters helped to shape their public's territorial imagination, creating images of a city at once heavenly and earthly that dwells in longing that must not be forgotten that compels one to bereave the dead that represents the fulfilment of prophecy and that is the site of immense cultural diversity. The dynamic history of its representation in lyrics and music helps dispel any notion that the Israeli-Palestinian crisis is timeless, intractable and based on static essential identities while there are continuities across historical divides. Radical change constantly transpires. *City of Song* combines analyses of musical meaning, political discourse and public performance over the long twentieth century, 1880s to 2010, to reveal how the Israeli-Palestinian crisis, territorial fixation on Jerusalem has been constructed historically, contingent and subject to artistic intervention in modernity. Through a musical history of Jerusalem, Figueroa introduces a novel humanities-centered approach to one of the world's most contested cities and one of the defining cultural and political questions of our era.

Introduction to Cities Xiangming Chen, Anthony M. Orum, Krista E. Paulsen, 2018-02-23. The revised and updated second edition of *Introduction to Cities* explores why cities are such a vital part of the human experience and how they shape our everyday lives. Written in engaging and accessible terms, *Introduction to Cities* examines the study of cities through two central concepts: that cities are places where people live, form communities and establish their own identities and that they are spaces such as the inner city and the suburb that offer a way to configure and shape the material world and natural environment. *Introduction to Cities* covers the theory of cities from an historical perspective right through to the most recent theoretical developments. The authors offer a balanced account of life in cities and explore both positive and negative themes. In addition, the text takes a global approach with examples ranging from Berlin and Chicago to Shanghai and Mumbai. The book is extensively illustrated with updated maps, charts, tables and photographs. This new edition also includes a new section on urban planning as well as new chapters on cities as contested

spaces exploring power and politics in an urban context It contains information on the status of poor and marginalized groups and the impact of neoliberal policies material on gender and sexuality and presents a greater range of geographies with more attention to European Latin American and African cities Revised and updated Introduction to Cities provides a complete introduction to the history evolution and future of our modern cities *The Politics of Sacred Places* Nimrod Luz,2023-09-07 The Politics of Sacred Places is a study of the socio political dimensions of sacred sites in Israel Palestine drawing on over 20 years of in depth ethnographic research which introduces cutting edge theories on secularization struggles for recognition and diversity issues This book focuses on contemporary sacred sites and their socio political meanings for minorities within a hegemonic and a secularizing state system It argues that sacred places provide a space that is less scrutinized by the state and where alternative visions of the socio political may be produced A plethora of sites and case studies are examined including the rural shrine of Maqam abu al Hijja in the lower Galilee the Mosque of Hassan Bek in the heart of Tel Aviv Jaffa and the most disputed sacred place in the region the Haram al Sharif in Jerusalem These sites are explored through mostly a phenomenological lens and in various contexts from the individual body to the global This book offers a critical analytical study of the socio political aspects of sacred sites in contemporary societies within the broader understanding of scale and the spatial turn in the study of religion **A Social History of Modern Tehran** Ashkan Rezvani Naraghi,2023-01-05 Outlines how Tehran s social spaces were transformed by shifting discourses and practices from the nineteenth to the mid twentieth century Relative Strangers Arpan Roy,2024-11-30 Examining how memory intergenerational transmission and kinship work together Relative Strangers sheds light on Romani life in Palestine Arpan Roy presents an ethnographic portrait of Dom Romani communities living between Palestine and Jordan zooming in on everyday life in working class neighborhoods and under conditions of perpetual war and instability The book focuses on how Doms are able to sustain ethnic difference through kinship even when public performances of difference are no longer emphasized a kind of alterity that is neither visible by obvious markers like race or religious difference nor detected by the antennas of the state Drawing on long term ethnographic fieldwork in Jerusalem Ramallah and Amman Roy makes a case for such alterity for Romani people and other groups in the region Analysing intimate ethnographic scenes through anthropological theories of kinship psychoanalysis social theory from the Global South and more the book reveals how alterity in the Middle East does not adhere to rigid identitarian categories Ultimately Relative Strangers demonstrates the inadequacy of transposing models of pluralism centred on European and American experiences of minoritization onto other contexts *The Urbanism of Exception* Martin J. Murray,2017-03-10 This book argues that understanding global urbanism in the twenty first century requires us to cast our gaze upon vast city regions without an urban core **Nationalism and the Haram al-Sharif/Temple Mount** Erik Freas,2017-07-12 This book examines the manner in which the Haram al Sharif Temple Mount has been appropriated by both Palestinians and Israelis as a nationalist symbol legitimizing respective claims

to the land From the late nineteenth century onward the site's significance became reconfigured within the context of modern nationalist discourses yet despite the originally secular nature of Palestinian and Israeli nationalisms the holy site's importance to Islam and Judaism respectively has gradually altered the character of both in a manner blurring the line between religious and national identities

Neoliberal Apartheid Andy Clarno, 2017-03-07 In recent years as peace between Israelis and Palestinians has remained cruelly elusive scholars and activists have increasingly turned to South African history and politics to make sense of the situation In the early 1990s both South Africa and Israel began negotiating with their colonized populations South Africans saw results the state was democratized and black South Africans gained formal legal equality Palestinians on the other hand won neither freedom nor equality and today Israel remains a settler colonial state Despite these different outcomes the transitions of the last twenty years have produced surprisingly similar socioeconomic changes in both regions growing inequality racialized poverty and advanced strategies for securing the powerful and policing the racialized poor *Neoliberal Apartheid* explores this paradox through an analysis of de colonization and neoliberal racial capitalism After a decade of research in the Johannesburg and Jerusalem regions Andy Clarno presents here a detailed ethnographic study of the precariousness of the poor in Alexandra township the dynamics of colonization and enclosure in Bethlehem the growth of fortress suburbs and private security in Johannesburg and the regime of security coordination between the Israeli military and the Palestinian Authority in the West Bank The first comparative study of the changes in these two areas since the early 1990s the book addresses the limitations of liberation in South Africa highlights the impact of neoliberal restructuring in Palestine and argues that a new form of neoliberal apartheid has emerged in both contexts

Shaping Jerusalem Francesco Chiodelli, 2016-10-14 *Shaping Jerusalem* Spatial planning politics and the conflict focuses on a hidden facet of the Israeli Palestinian conflict the relentless reshaping of the Holy City by the Israeli authorities through urban policies spatial plans infrastructural and architectural projects land use and building regulations From a political point of view the Israeli Palestinian conflict may appear to be at an impasse however it is precisely by looking at the city's physical space that one can perceive that a war of cement and stone is under way Many books have been written on the Israeli Palestinian conflict over Jerusalem some of them have focused on the urban fabric *Shaping Jerusalem* uniquely discusses the role of Israeli spatial actions within the conflict It argues that Israel's main political objective control over the whole city is ordinarily and silently pursued through physical devices which permanently modify the territory and the urban fabric Relying on strong empirical evidence and data through the analysis of statistical data official policies urban projects and laws author Francesco Chiodelli substantiates the political discussion with facts and figures about the current territorial situation of the city and about the Israeli policies implemented in the city in the past six decades

European Diplomacy in Practice Federica Bicchieri, Niklas Bremberg, 2018-12-07. This book aims to show practice approaches at work in the fields of European diplomacy and security broadly conceived. It sets out to provide readers with a hands-on sense of where research on social practices and European diplomacy, security and foreign policy currently stands. The book reviews how practice approaches have evolved in International Relations (IR) and brings together an unique set of contributions which highlights how insights from practice approaches can be applied to advance research on a number of key issues in these fields. While the debate about practices in IR goes beyond the case of diplomacy, the latter has become a showcase for the former and this book continues the debate on practices and diplomacy by zooming in on the European Union. Examples of issues covered include the evolution of EU-NATO relations seen from the perspective of communities of practice, burden sharing as an anchoring practice for European states, involvement in crisis management operations, the practical knowledge shaping the EU's responses to the Arab Uprisings, agency as accomplished in and through EU counter-piracy practices and the political resistance to Israeli occupation and the non-official recognition of Palestine performed by EU diplomats. Thus by focusing on specific practices and analytical mechanisms that contribute to understand the transformations of European diplomacy, security and foreign policy, this book provides essential readings to anyone interested in innovative ways to grasp the contemporary challenges that face the EU and its member states. The chapters originally published as a special issue of *European Security*.

perspectives After briefly discussing Israel's history and the early development of the state Gregory Mahler then examines the social religious economic cultural and military contexts within which Israeli politics takes place He makes special note of Israel's geopolitical situation of sharing borders with and being proximate to several hostile Arab nations The book explains the operation of political institutions and behavior in Israeli domestic politics including the constitutional system and ideology parliamentary government the prime minister and the Knesset political parties and interest groups the electoral process and voting behavior and the machinery of government Mahler also considers Israel's foreign policy setting and apparatus the Palestinians and the Israeli Palestinian conflict the particularly sensitive questions of Jerusalem and the Israeli settlement movement and the Middle East peace process overall This clear and concise text provides an invaluable starting point for all readers needing a cogent introduction to Israel today *The Palestinians and East Jerusalem* Bruno

Huberman, 2023-12-28 Over the last two decades the Israeli government has implemented policies for the development of East Jerusalem These comprise urban revitalization as well as professional training and the promotion of entrepreneurship for the Palestinians But how do these policies co exist under Israeli settler colonial power This book focuses on the contradiction between the rise of neoliberal development in East Jerusalem and the simultaneous continuation of Israeli settler colonialism It argues that the combination of settler colonialism and neoliberalism allows for the primitive accumulation of capital to also occur permanently through deceptive soft forms More than this based on theoretical research interviews and an analysis of race and class relations in East Jerusalem the book shows that neoliberal development is used to facilitate the reproduction of racial hierarchies settler privileges and the pacification of the Palestinian residents where these outcomes are presented as the natural result of market relations The author calls this environment neoliberal settler colonialism and explores Palestinians new acts of resistance that exist ambivalently within this structure A significant theoretical contribution the study highlights a new settler colonial and neoliberal sociability that co opts the exploited and oppressed **25 Years Berlin Republic** Todd Herzog, Anna Senuysal, Tanja Nusser, 2019-02-21 25 Years Berlin Republic
