SOLAR SYSTEM

Name: _____ Date: _____

The Solar System is a collection of celestial bodies that include the Sun, planets, moons, dwarf planets, asteroids, comets, and meteoroids.

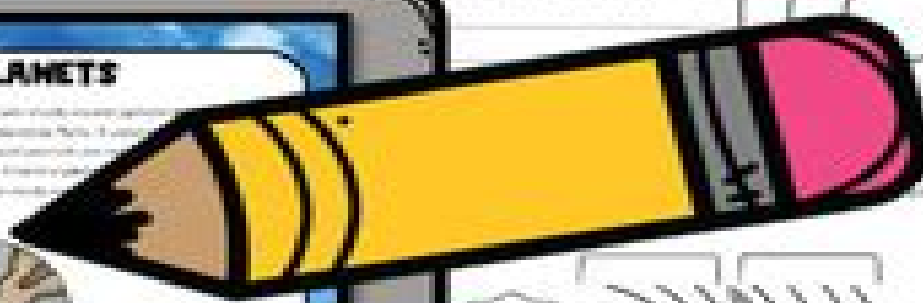

It is called the Solar System because the Sun is the central star of the system. The Solar System is made of many things.

Why is it called the Solar System?

DWARF PLANETS

Dwarf planets are celestial bodies that are not planets. They are smaller than planets and do not have enough mass to become planets. They are also not moons of planets. They are found in the outer Solar System.
