tradition of Elijah Anderson's *Code of the Street* and Katherine Newman's *No Shame in My Game* this startling new ethnography by Donald Braman uncovers the other side of the incarceration saga the little told story of the effects of imprisonment on the prisoners families Since 1970 the incarceration rate in the United States has more than tripled and in many cities urban centers such as Washington D C it has increased over five fold Today one out of every ten adult black men in the District is in prison and three out of every four can expect to spend some time behind bars But the numbers don't reveal what it's like for the children wives and parents of prisoners or the subtle and not so subtle effects mass incarceration is having on life in the inner city Author Donald Braman shows that those doing time on the inside are having a ripple effect on the outside reaching deep into the family and community life of urban America Braman gives us the personal stories of what happens to the families and communities that prisoners are taken from and return to Carefully documenting the effects of incarceration on the material and emotional lives of families this groundbreaking ethnography reveals how criminal justice policies are furthering rather than abating the problem of social disorder Braman also delivers a number of genuinely new arguments Among these is the compelling assertion that incarceration is holding offenders unaccountable to victims communities and families The author gives the first detailed account of incarceration's corrosive effect on social capital in the inner city and describes in poignant detail how the stigma of prison pits family and community members against one another Drawing on a series of powerful family portraits supported by extensive empirical data Braman shines a light on the darker side of a system that is failing the very families and communities it seeks to protect

The Shoshone-Bannocks John W. Heaton, 2005 Even in the face of internal disputes between cattlemen and hay cutters the people of Fort Hall found innovative ways such as participation in new religious experiences cultural redefinition and regular community gatherings to manage the contradictions that stemmed from market integration Heaton tells how the Shoshone Bannocks made a meaningful choice between productive commerce and a more typical reliance on subsistence and wage labor Their leaders found new ways to unite disparate bands and kin groups to resist attempts to open reservation land to exploitation by non Indians and through careful land cessions they were able to obtain the capital needed to develop reservation resources themselves

night television classrooms political debates and Hollywood films Behind the scenes however scientists were sharply divided their disagreements centering squarely on questions of race and gender Then in the 1970s the theory unraveled altogether when primatologists discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science Creatures of Cain argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature      **Historical**

**Anthropology of the Family** Martine Segalen,1986-11-28 Over the past decade or so the social scientific sociological analysis of the family has been obliged to reconsider its traditional view that industrialisation triggered a shift within society from the large family which fulfilled all social functions from socialising the children to caring for the sick and the old to the modern nuclear family which was regarded solely as being the locus for emotional relationships Historians have shown that in the past there was a variety of family structures within a range of varying demographic economic and cultural frameworks distinctive for each society At the same time the interaction between sociology and social anthropology has led to a clearer conceptual analysis of that vague polysemic term family and notions of dwelling place descent marriage the relative roles of husband and wife and parent child relations as well as the more general relations between generations have in a variety of past and present social contexts been taken apart and analysed In this book the author synthesises European and North American historical and social anthropological material on the family that shows the reversal of the frequently held view of the family as an institution in decline showing it instead to be both dynamic and resistant      **The Ancient Church as**

**Family** Joseph H. Hellerman,2001 The author explores the literature of the first three centuries of the church in terms of group identity and formation as surrogate kinship Why did this become the organizing model in the earliest churches How did historical developments intervene to shift the paradigm How do ancient Mediterranean kinship structures correlate with church formation Hellerman traces the fascinating story of these developments over three centuries and what brought them about His focus is the New Testament documents especially Paul s letters second century authors and concluding with Cyprian in the third century Kinship terminology in these writings behaviors of group solidarity and the symbolic power of kinship language in these groups are examined      **Clans and Democratization: Chechnya, Albania, Afghanistan and**

**Iraq** Charlotte Hille,2020-05-06 In Clans and Democratization Charlotte Hille investigates clan societies in Afghanistan Iraq Albania and Chechnya She explores and compares the values of clans with those in Western democratic states while focusing at conflict resolution and democratization Based on theory and practice this book provides tools to facilitate democratic state building in clan based societies      **The Texas Cherokees** Dianna Everett,1995-03-01 In 1819 to 1820 several hundred Cherokees led by Duwali a chief from Tennessee settled along the Sabine Neches and Angelina rivers in east Texas

Welcomed by Mexico as a buffer to U S settlement Duwali s people had separated from other Western Cherokees in an effort to retain the tribe s traditional lifeways As Dianne Everett details in *The Texas Cherokees* they found themselves caught between two fires in many respects between the Cherokee ideal of harmony and the reality of factionalism between white settlers pushing westward and western Indians resisting incursions and between traditional ways and the practical necessity of accommodating to whites

*Daily Life and Demographics in Ancient Japan* William Wayne Farris,2020-08-06 For centuries scholars have wondered what daily life was like for the common people of Japan especially for long bygone eras such as the ancient age 700 1150 Using the discipline of historical demography William Wayne Farris shows that for most of this era Japan s overall population hardly grew at all hovering around six million for almost five hundred years The reasons for the stable population were complex Most importantly Japan was caught up in an East Asian pandemic that killed both aristocrat and commoner in countless numbers every generation These epidemics of smallpox measles mumps and dysentery decimated the adult population resulting in wide ranging social and economic turmoil Famine recurred about once every three years leaving large proportions of the populace malnourished or dead Ecological degradation of central Japan led to an increased incidence of drought and soil erosion And war led soldiers to murder innocent bystanders in droves Under these harsh conditions agriculture suffered from high rates of field abandonment and poor technological development Both farming and industry shifted increasingly to labor saving technologies With workers at a premium wages rose Traders shifted from the use of money to barter Cities disappeared The family was an amorphous entity with women holding high status in a labor short economy Broken families and an appallingly high rate of infant mortality were also part of kinship patterns The average family lived in a cold drafty dwelling susceptible to fire wore clothing made of scratchy hemp consumed meals just barely adequate in the best of times and suffered from a lack of sanitary conditions that increased the likelihood of disease outbreak While life was harsh for almost all people from 700 to 1150 these experiences represented investments in human capital that would bear fruit during the medieval epoch 1150 1600

*Copula* Robyn Ferrell,2012-02-01 How will the ability to manipulate human reproduction change our social world and the relationship between the sexes Taking an explicitly interdisciplinary approach to gender and reproductive technology Robyn Ferrell examines this question in the light of feminist theories of sexual equality and sexual difference arguing that technology itself can be seen as a kind of reproduction Invoking a concept of reproduction that understands it as generic Ferrell asserts that in any reproduction something is produced of a kind that was there before and yet that is also new Technology is therefore generically reproductive since it produces new matter of the same kind In addition to key figures in French feminism Ferrell draws from psychoanalysis and contemporary continental thinkers ranging from Heidegger to Haraway

**Michal's Moral Dilemma** Jonathan Y. Rowe,2011-06-21 Michal s Moral Dilemma proposes that attention should be paid to the moral goods that feature in the text before arguing that the family a central feature of Old Testament morality should be understood as a set of practices rather

than an institution Jonathan Rowe discusses the use of models of social action to comprehend the social world of the Bible and suggests a modified version of Bakhtin's theory of heteroglossic voices can help readers appreciate how authors present a moral vision by approving some characters' actions whilst undermining others The discussion of Michal's moral dilemma adduces anthropological theories and ethnographic data concerning violence lying and the relationship between fathers and daughters Given that the conflicts of moral goods are resolved by characters choosing to act in a certain way Rowe enquires after the author's assessment of each character's moral choices arguing that Michal's loyalty to David and deception of Saul was counter cultural By approving of her choice the author affirms the importance of loyalty to the Davidic dynasty

*Reclaiming English Kinship* Mary Bouquet, 1993 Mary Bouquet argues that while writing off the idea of kinship in English culture anthropologists of the British school absorbed the notion of pedigree into their analysis it runs through the genealogical method which they used to conceptualise the organisation of other societies She shows how British anthropological ideas about other cultures thus have their own cultural specificity A brief comparison with the French ethnological approach to kinship indicates some differences of emphasis
