Tips for taking the Biology Keystone Test

1. Read and then reread the question. Logically think about what the question is asking for.
2. Think of the answer before you look at the list of answers. Check the list and apply the answers to the question.
3. Cross off answers you know are incorrect.
4. Don't let long paragraph questions confuse you, REREAD the question and try your best!
5. Look for key scientific terminology in the answer that relates to the question.
6. Don't get frustrated if you don't know the answer to one question. Move on and keep working hard!
7. When answering the written response questions, write as much as you can. The more you write, the better of a chance you have of receiving a higher score, unless it specifically asks for a short answer.
