1.-BACKGROUND

The factor structure of the MBSRQ is under debate due to the limitations of previous research methods such as principal component analysis (PCA)¹. Although the four-dimensional 38-item version of the MBSRQ is widely used in Spain², recent studies suggest a more efficient two-factor 15-version item³. However, no studies have directly compared both versions with a Spanish population sample.

Aims:

- To compare the classic four-factor model and the new proposed two-factor model to contribute to a better understanding of its validity and inform future research and practice in the assessment of body image in Spanish-speaking populations.

2.-METHODS

Participants & Design

- A sample of 1012 participants was selected using stratified random sampling. Inclusion criteria: (i) to be ≥18 years; (ii) not to have medical issues for which PA was contraindicated; and (iii) to provide informed consent.
- The study was conducted in 2018. Data for this analysis were collected through a dedicated online panel.

Measures & Data Analysis

- Questionnaire-1: Multidimensional Body Self Relations Questionnaire⁴. We used the Spanish Version of the Multidimensional Body Self Relations Questionnaire².
- The factor structure was investigated using CFA through WLSMV. MEI was evaluated through the change in $\Delta CFI/\Delta RMSEA$. Software: MPLUS 8.0.

3.-RESULTS

→FACTOR STRUCTURE: 4-factor model vs. 2-factor model

	RMSEA	CFI	TLI	SRMR
2-factor model	0.050	0.925	0.917	0.067
4-factor model	0.109	0.696	0.676	0.098

→RELIABILITY: For the two-factor model, Cronbach's Alpha is greater than 0.85 across dimensions.

→FACTORIAL INVARIANCE:

4-factor model for sex. Sex: 1=Women (n=471); 2=Men (n=482).

	N (48)	χ^2 value	df	CFI	TLI	RMSEA	SRMR	χ^2 value	χ^2 df	CFI	RMSEA	Decision
Model 1: Configural	2243,479 (1284)	8,000	0,938	0,935	0,048 - 0,042 - 0,0470	0,049	-	-	-	-	-	-
Model 2: Metric	2251,799 (132)	0,000	0,938	0,933	0,042 - 0,0470 0,040	0,079	2 vs. 1	0,000	0,000	Accept	-	-
Model 3: Scalar	2245,792 (1322)	0,000	0,938	0,930	0,042 - 0,0470	0,079	3 vs. 2	0,000	0,000	Accept	-	-

4.-CONCLUSIONS

- The current version of the model demonstrated satisfactory reliability, convergent validity, and discriminant validity, supporting its credibility.
- The model's measurement equivalence across sexes was confirmed, indicating that it can be used effectively for both men and women.
- The original factor structure was not supported by the CFA results, but a two-factor model focusing on subjective importance of physical appearance and physical fitness showed a good fit. This model can be utilized by practitioners for designing interventions.

Body Image and the Asian Experience Hsiu-Lan Cheng, Yuying Tsong, 2024-11-13 Individuals of Asian descent are a demographic often overlooked in mainstream body image scholarship Historically body image concerns were thought to only affect white upper to middle class women in North America and Western Europe However empirical data accumulated in recent decades have subverted this myth Contrary to popular belief and stereotypes that Asian Americans are a Model Minority in the United States they experience significant body image concerns as well as related disordered eating and mental health challenges Asian diasporas in Western countries also face challenges similar to those faced by Asian Americans

e.g. racialized and objectified views of Asians. Asian nationals in Asia on the other hand are juggling between their collective and national standards of beauty, fitness and the body image ideals propagated through commercialism and capitalization amidst the historical context of colonization and the contemporary atmosphere of globalization.

Body Image and the Asian Experience Asians, Asian Americans and Asian Diasporas Across the Globe discusses the dearth of knowledge and sometimes misinformation about body image among people of Asian descent including Asian nationals dwelling in Asia and those in the diaspora, Asian Americans, Asian immigrants in the United Kingdom, Australia etc. The first section of the book reviews the applicability of existing theories in understanding the body image experiences of individuals of Asian descent and proposes a new theoretical framework that emphasizes both decolonizing and intersectional perspectives in conceptualizing Asian body image. The next section examines the current state of research on body image among Asians, Asian Americans and Asian diasporas around the globe including attending to some seriously neglected specific demographic and social identity groups. The last section explores mental health and psychosocial implications of body image in the aspects of mental disorders, interpersonal and social relationships and identity development. Explores the body image of Asians offering new theoretical insights to address their unique experiences globally. Focuses on underrepresented groups including Asian sexual and gender minority men, advancing understanding in body image research. Examines how body image influences mental health, relationships, identity and societal aspects.

This essential guide for clinicians and researchers presents new empirical research on lesbian/bisexual women's mental health. It explores specific challenges that face various lesbian and bisexual female populations with research on dysthymia, depression and anxiety, including a chapter on depressive distress among African American women, the way that community size and religiosity impact lesbian/bisexual women's psychosexual development, the relationship between shame and a client's attachment style, the mental health implications of same-sex marriage, mental health in Taiwan's LGBT community with a focus on community members' sexual orientation, gender roles and gender identity, the interconnectedness of sexual fantasies, psychological adjustment and close relationship functioning in lesbian/bisexual women, body image and eating issues. As the diversity of this population becomes progressively more evident, so does the necessity for deeper exploration of the mental health problems facing lesbians and bisexuals.
