

ACCOUNTING 1

Accounting Basics

Accounting Standards

- Accounting principles have been in existence since the late 1400s when Giovanni Lami Paroli, an Italian mathematician, first wrote about them.
- Modern-day accounting principles in the United States are collectively accepted accounting principles (GAAP). These principles guide the work of accountants and auditors.
- The U.S. Securities and Exchange Commission (SEC) has regulatory authority over accounting principles used by public corporations.
 - The SEC is a federal agency responsible for enforcing the federal securities laws and regulating the securities industry.
 - It is responsible for the development of GAAP in the accounting profession via the Financial Accounting Standards Board (FASB).
- The FASB develops new standards via due process activities that allow input from various stakeholders and accountants in the industry.
- The International Accounting Standards Board (IASB) develops global accounting standards.
 - Multi-national companies follow IASB standards.
 - The IASB works with other key global accounting standards bodies to create a single source of accounting standards.
- The Government Accounting Standards Board (GASB) sets state and local government standards for accounting.
 - The GASB is a private, non-governmental organization subject to oversight and funding by the Department of Education (DOE).
 - The federal government follows standards set by the GASB when performing accounting for its state.

Concepts & Principles

- Entity concept**
 - An organization stands apart from other organizations as a separate economic unit.
 - Assets and obligations must be accounted for separately from the personal assets and obligations of its owner.
- Going concern concept (i.e., continuity assumption)** The entity will continue to exist long enough to meet its contractual obligations and carry out plans.
 - Businesses should report information on regular intervals.
 - Annual reports show income for the last 12 months and end on the last day of the fiscal year. Therefore, annual reports show the financial position as of the last day of the fiscal year.
 - Public companies report financial information quarterly (3-month time intervals).
- Reliability principle**
 - Accounting records must be based on the most reliable data available.
 - Reliable measurements in amounts, objectives, methods, and verifiability.
- Relevance principle**
 - Accounting information must be timely.
 - Accounting information in production provides feedback and helps decision making.
- Cost principle** Assets and services acquired are recorded at actual historical cost unless their market value.
- Conservatism**
 - Losses must be recognized to avoid overvaluing assets and overstate and understate expenses and liabilities.
 - Accounting estimates should be based on conservative assumptions.
- Revenue principle**
 - Revenue should only be recorded when earned.
 - Revenue is earned when the business has completed rendering services to the customer.
 - The amount to record is equal to the cash value of services or goods.
 - The collection of cash must be reasonably assured or credit sales.
- Matching principle**
 - Expenses must be matched against revenues in the same accounting period.
 - Costs incurred in previous periods in a period are recognized as expenses.
- The accounting period**
 - The accounting period is the period connecting the business activities.
 - It is usually 1 year ending on Dec. 31 (called the fiscal year in the calendar year).
 - Other fiscal year ends will use any other date of the year elected by management.
- Full-cost accounting**
 - The impact of costs is not recognized until cash is paid or received.
 - Revenue is recorded when cash is received; expenses are recorded when cash is paid.
 - This method is adequate for small companies that don't report to external parties, but it is not acceptable under GAAP.
- Accrual-basis accounting**
 - The impact of costs is recognized as they occur.
 - Revenue is recorded when earned; expenses are recorded when incurred.
 - Transactions are recorded when cash has not been received or paid.
 - This method is required by GAAP.
