

Atmosphere Notes

Composition of Earth's Atmosphere

- EA is made up of nitrogen (78%), Oxygen (21%), and 1% of argon, carbon dioxide, water vapor, and other gases, as well as particles of liquids and solids.
- Nitrogen is the most abundant gas in the atmo.
- Ozone (O_3 a form of oxygen with 3 atoms instead of the usual 2).

Importance of the Atmos

- EA make conditions suitable for living things.
- Traps in energy from the sun and keeps most of the Earth's surface warm enough for water to exist as a liquid.
- Protects from dangerous radiation from the sun.
- Prevents surface from being hit by most meteors.

Layers of the Atmos

- There are 4 layers (troposphere, stratosphere, mesosphere, and thermosphere)
- Weather happens in the troposphere
- We live in the troposphere
- The stratosphere contains the ozone layer which protects us from harmful UV radiation.

Language for Learning Mathematics: Assessment for Learning in Practice Clare Lee, 2006-06-16

Assessment for learning is a powerful way to raise standards and improve learning. However as this book shows effective assessment for learning in the mathematics classroom depends on pupils being able and willing to use mathematical language to express their ideas. When discussion, negotiation and explanation are encouraged teachers use assessment for learning creatively the work quickly becomes more challenging and the pupils come to see themselves as successful learners. Many pupils find it difficult to express ideas in mathematics because of problems with the language that is used to convey mathematical concepts. This book shows teachers how to help pupils express what they really know and understand so that assessment for learning can be used. The book discusses what mathematical language is and what it is not. Suggests practical approaches to introducing more discourse into the classroom. Explores the ideas of assessment for learning, rich questioning and dialogue, effective feedback and peer and self assessment and suggests how these can be used effectively in mathematics classrooms to improve learning. *Language for Learning Mathematics* is key reading for teachers and trainee teachers in mathematics as well as assessment advisors at LAs.

The Theory of Chaotic Attractors Brian R. Hunt, Judy A. Kennedy, Tien-Yien Li, Helena E. Nusse, 2013-06-05

The editors felt that the time was right for a book on an important topic: the history and development of the notions of chaotic attractors and their natural invariant measures. We wanted to bring together a coherent collection of readable, interesting, outstanding papers for detailed study and comparison. We hope that this book will allow serious graduate students to hold seminars to study how the research in this field developed. Limitation of space forced us painfully to exclude many excellent relevant papers and the resulting choice reflects the interests of the editors. Since James Alan Yorke was born August 3 1941 we chose to have this book commemorate his sixtieth birthday honoring his research in this field. The editors are four of his collaborators. We would particularly like to thank Achi Dosanjh, senior editor, mathematics, Elizabeth Young, assistant editor, mathematics, Joel Ariaratnam, mathematics editorial, and Yong Soon Hwang, book production editor, from Springer Verlag in New York for their efforts in publishing this book.
