Minds Online Michelle D. Miller,2014-10-20 From wired campuses to smart classrooms to massive open online courses MOOCs digital technology is now firmly embedded in higher education But the dizzying pace of innovation combined with a dearth of evidence on the effectiveness of new tools and programs challenges educators to articulate how technology can best fit into the learning experience Minds Online is a concise nontechnical guide for academic leaders and instructors who seek to advance learning in this changing environment through a sound scientific understanding of how the human brain assimilates knowledge Drawing on the latest findings from neuroscience and cognitive psychology Michelle Miller explores how attention memory and higher thought processes such as critical thinking and analytical reasoning can be enhanced through technology aided approaches The techniques she describes promote retention of course material through frequent low stakes testing and practice and help prevent counterproductive cramming by encouraging better spacing of study Online activities also help students become more adept with cognitive aids such as analogies that allow them to apply learning across situations and disciplines Miller guides instructors through the process of creating a syllabus for a cognitively optimized fully online course She presents innovative ideas for how to use multimedia effectively how to take advantage of learners existing knowledge and how to motivate students to do their best work and complete the course For a generation born into the Internet age educational technology designed with the brain in mind offers a natural pathway to the pleasures and rewards of deep learning

The Science of Biology: Study Guide Paul B. Weisz,Robert M. Brenner,1963 **Ebook: Biology** BROOKER,2014-09-16 *Ebook Biology* **Designing Effective Distance and Blended Learning Environments**

in K-12 Driscoll III, Thomas F.,2021-11-12 It has quickly become apparent in the past year that online learning is not only an asset but it is critical to the continued education of youth during times of crisis However districts and schools across the nation are in need of guidance and practical research backed approaches to distance and hybrid learning The current COVID 19 crisis has demonstrated that effective learning in K 12 is possible but many districts struggled and continue to struggle in achieving that reality There is also the growing consensus that even if things return to normal distance and blended learning strategies should continue to be employed in many ways across the K 12 environment Designing Effective Distance and Blended Learning Environments in K 12 provides key insights into the ways that school districts and educators from across the world have effectively designed and implemented distance and blended learning approaches to enable and enhance student learning The diverse collection of authors from various demographics and roles in school systems will benefit readers across a wide spectrum of school community stakeholders There will also be an emphasis on how research and theory is put into practice along with an honest discussion of what strategies and actions were successful as well as those that were less so This book is essential for professionals and researchers working in the field of K 12 education particularly superintendents curriculum developers professional learning designers school principals instructional technology specialists and teachers as well as administrators researchers academicians and students interested in the effective practices being used in blended learning approaches
