Department of Education, 1917 **The Social and Economic Roots of the Scientific Revolution** Gideon Freudenthal, Peter McLaughlin, 2009-05-20 The texts of Boris Hessen and Henryk Grossmann assembled in this volume are important contributions to the historiography of the Scientific Revolution and to the methodology of the historiography of science They are of course also historical documents not only testifying to Marxist discourse of the time but also illustrating typical European fates in the first half of the twentieth century Hessen was born a Jewish subject of the Russian Czar in the Ukraine participated in the October Revolution and was executed in the Soviet Union at the beginning of the purges Grossmann was born a Jewish subject of the Austro-Hungarian Kaiser in Poland and served as an Austrian officer in the First World War afterwards he was forced to return to Poland and then because of his revolutionary political activities to emigrate to Germany with the rise to power of the Nazis he had to flee to France and then America while his family which remained in Europe perished in Nazi concentration camps Our own acquaintance with the work of these two authors is also indebted to historical context under incomparably more fortunate circumstances the revival of Marxist scholarship in Europe in the wake of the student movement and the professionalization of history of science on the Continent We hope that under the again very different conditions of the early twenty-first century these texts will contribute to the further development of a philosophically informed socio-historical approach to the study of science Economic Analysis and Moral Philosophy Daniel M. Hausman, Michael S. McPherson, 1996-03-28 Understanding moral philosophy can lead to better economics Conversely economic insights and analytical tools can help philosophers This book draws these two ideas together Part I focuses on rationality and argues that in defending their model of rationality economists find themselves espousing fragments of a highly contestable moral theory In Part II the authors consider the dubious theory of welfare implicit in standard evaluations of welfare economics and utilitarianism Part III of this book is concerned with freedom rights equality and justice which are also important in evaluating economic policies and institutions Part IV shows that technical work in economics is guided by ethical concepts and is relevant to moral theorizing

Research in Education, 1974 **Resources in Education**, 1999-10 Readings in Economics Paul Anthony Samuelson, Felicity Skidmore, 1970 **Schooling for Resilience** Edward Fergus, Pedro Noguera, Margary Martin, 2020-08-12 As a group Black and Latino boys face persistent and devastating disparities in achievement when compared to their White counterparts they are more likely to obtain low test scores and grades be categorized as learning disabled be absent from honors and gifted programs and be overrepresented among students who are suspended and expelled from school They are also less likely to enroll in college and more likely to drop out Put simply they are among the most vulnerable populations in our schools Schooling for Resilience investigates how seven newly formed schools created specifically to serve boys of color set out to address the broad array of academic and social problems faced by Black and

Latino boys Drawing on student and teacher surveys focus groups interviews and classroom observations the authors investigate how these schools were developed what practices they employed and how their students responded academically and socially In particular they focus on the theory of action that informed each school s approach to educating Black and Latino boys and explore how choices about school structure and culture shaped students development and achievement In doing so the authors identify educational strategies that all schools can learn from This thoughtful passionately argued volume promises to influence efforts to improve the achievement and life outcomes of Black and Latino boys for years to come
