GETTING STARTED
Before you begin your workout, it is important to warm up your muscles. This can be done by performing light cardio for 5-10 minutes. Once you are warmed up, you can begin your workout. Start with the exercises listed in the chart, and work your way up to more advanced exercises as you become more comfortable with the machine. Remember to always use proper form and to breathe correctly during each exercise. If you are unsure of how to perform an exercise, consult the manual or ask a fitness professional for assistance. Finally, remember to stretch after your workout to help prevent muscle soreness and injury.

SAFETY PRECAUTIONS
Always use proper form and technique when performing exercises. Do not overexert yourself or lift weights that are too heavy for you. If you feel any pain or discomfort, stop the exercise immediately. It is also important to keep the machine clean and well-maintained. Regularly check the cables, pulleys, and other components for wear and tear. If you notice any issues, contact your dealer or the manufacturer for assistance. Finally, always use common sense and listen to your body. If you are unsure of how to perform an exercise, consult the manual or ask a fitness professional for assistance.
