LSC CPS1 () : LSC CPS1 (USAFA) Applied Project Management Julie Chesley, Wiley Larson, Marilyn McQuade, Robert Menrad, 2008-10-06 Applied Project Management for Space Systems is the 16th book produced by the US Air Force Academy's Space Technology Series. The best of the best performing project managers have contributed their experience and lessons learned to this project. 48 authors with over 400 years of collective experience in managing space projects have contributed to this book. The purpose of Applied Project Management for Space Systems is to provide inspiration, processes, tools, and information for the project managers that are leading the way in complex space system design, development, and operation. It augments the superb general project management information and approaches offered by the Project Management Institute and a host of other books. Applied Project Management for Space Systems presents approaches for managing complex space projects along with information that is intended to help the aspiring or current project manager move to a higher level of understanding and performance. It is meant for practitioners as they work through projects but may also serve as a primary text or reference for graduate level courses and development programs. Many space-related case studies, samples, and lessons learned are spread throughout the book to supply readers with historical insights to manage and guide current space projects.

LSC CPS1 () : LSC CPS1 (USAFA) Applied Systems Engineering - Space Wiley Larson, Douglas Kirkpatrick, Jerry Sellers, Lawrence Thomas, Dinesh Verma, 2009-08-28 Applied Space Systems Engineering is the 17th book produced by the US Air Force Academy's Space Technology Series team. The purpose of Applied Space Systems Engineering (ASSE) is to provide inspiration, processes, approaches, tools, and information for systems engineers that are leading the way in complex aerospace system design, development, and operation. An extensive author and editor team created this book based on a complete and rigorous set of systems engineer competencies rooted in the experiences and philosophies of seasoned space systems engineers from across the community. The best of the best performing system engineers have contributed their wealth of experience, successful tools, and approaches and lessons learned to this project. This book presents the how-to necessary to systems engineer complex aerospace-related projects along with information to help the aspiring or current systems engineer achieve a higher level of understanding and performance. It is geared to practitioners as they work through projects but may also serve as a primary text or reference for graduate level courses and development programs. Many aerospace-related case studies, examples, and lessons learned are spread throughout ASSE to provide historical insights and practical applications. A companion text, Applied Project Management for Space Systems, is also available.

LSC CPS1 () : LSC CPS1 (Gen use) Cost Effective Space Mission Operations Gael Squibb, Daryl Boden, Wiley Larson, 2006-06-30 Cost Effective Space Mission Operations, Second Edition, describes the relationship between mission operations and the other elements of the space mission as well as specific operations tasks. This book defines a process that helps the mission operations manager translate mission objectives and requirements into a viable mission operations concept. The mission

operations manager must develop this operations concept early enough during concept exploration so that the project manager can trade the future cost of operations against current development costs Written for professionals and students involved in systems engineering and operations in space this book is valuable for program managers mission operations managers spacecraft engineers and designers project scientists and operators Cost Effective Space Mission Operations includes detailed descriptions of thirteen mission operations functions provides a process for developing a mission operations concept and describes a model for evaluating the cost and complexity of an operations system The book also covers how to conduct routine launch and early orbit and special operations as well as how to operate interplanetary international microsatellite and crewed missions [LSC CPS1 \(\) : LSC CPS1 Spacepower for New Mille](#) Peter Hays,James Smith,Alan Van Tassel,Guy Walsh,2000-09-19 Spacepower for a New Millennium examines how military space activities might best contribute to United States national security by analyzing key current and future issues such as missile defense and how to organize for military space Composed of essays written by eminent participants in the realms of space politics academia and national security this book focuses on the issues raised in U S Space Command s 1998 report Long Range Plan Implementing USSPACECOM Vision for 2020 The book is divided into four parts current military space issues space and military defense organizing for military space missions and future military space missions
