Lucy To Language The Benchmark Papers:

Lucy to Language British Academy,2014 **Evolutionary Processes in the Natural History of Religion** Hansjörg Hemminger,2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field **The Rise of Homo Sapiens** Frederick Lawrence Coolidge,Thomas Grant Wynn,2018 The Rise of Homo Sapiens presents a provocative theory about the evolution of the modern mind based on archaeological evidence and the working memory model of experimental psychologist Alan Baddeley

United States Law and Policy on Transitional Justice Zachary D. Kaufman,2017-01-02 In United States Law and Policy on Transitional Justice Principles Politics and Pragmatics Zachary D Kaufman explores the U S government s support for or opposition to certain transitional justice institutions By first presenting an overview of transitional justice options such as war crimes tribunals and then analyzing six historical case studies Kaufman evaluates why and how the United States has pursued particular transitional justice options since World War II *Islamic Ecumene* David S. Powers,Eric

Tagliacozzo,2023-11-15 The essays in *Islamic Ecumene* address the ways in which Muslims from Morocco to Indonesia and from sub Saharan Africa to the steppes of Uzbekistan are members of a broad cultural unit Although the Muslim inhabitants of these lands speak dozens of languages represent numerous ethnic groups and practice diverse forms of Islam they are united by shared practices and worldviews shaped by religious identity To highlight these commonalities the co editors invited a team of scholars from a wide range of disciplines to examine Muslim societies in comparative and interconnected

ways The result is a book that showcases ethics education architecture the arts modernization political resistance marriage divorce and death rituals Using the insights and methods of historians anthropologists literary critics art historians political scientists and sociologists Islamic Ecumene seeks to understand Islamic identity as a dynamic phenomenon that is reflected in the multivalent practices of the more than one billion people across the planet who identify as Muslims *Marking Place* Jonathan Last,2022-01-11 Much archaeological work is concerned with identifying gaps in our knowledge and developing strategies for addressing them we perhaps spend less time thinking about how research should proceed when we already know relatively speaking quite a lot The program of dating causewayed enclosures in southern Britain that was published in 2011 as *Gathering Time* Oxbow Books gave us a new more precise chronology for many individual sites as well as for enclosures as a whole and as a consequence a far better sense of their significance and place in the story of the British Early Neolithic Arguably causewayed enclosures are now the best understood type of Neolithic monument Yet work continues and in the last few years new discoveries have been made older excavations published and further work undertaken on well known sites Viewing this research within the new framework for these monuments allows us to assess where our understanding of enclosures has got to and where the focus of future research should lie This volume originates from a Neolithic Studies Group meeting held in November 2019 which aimed firstly to showcase and explore the wide range of current work on causewayed enclosures and related sites and secondly to assess what we still want to know about these sites in light of the monumental achievement of *Gathering Time* The papers collected here comprise reports on recent development led fieldwork academic research and community projects and the volume concludes with a reflection by the authors of *Gathering Time* [Handbook of Pleistocene Archaeology of Africa](#) Amanuel Beyin,David K. Wright,Jayne Wilkins,Deborah I. Olszewski,2023-08-17 This handbook showcases an Africa wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent The focal time spans the Pleistocene Epoch c 2 5 million 11 700 years ago during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities a large brain relative to body size language and social complexity developed in the general forms that they are found today The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by Collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology Providing reference datasets for teaching and researching African prehistory Making Africa s Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine multiple archaeological localities lumped under specific projects or study areas The rest of the

contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent's Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists

The Earliest Europeans Robert Hosfield, 2020-05-31 The Earliest Europeans explores the early origins of man in Europe through the perspective of a year in the life how hominins in the Lower Palaeolithic coped with the year round practical challenges of mid latitude Europe with its distinctive temperatures seasonality patterns and available resources Current research has provided increasingly robust archaeological and Quaternary Science records but there are ongoing uncertainties as to both the earliest Europeans specific survival strategies and behaviours and the character of their dispersals into Europe In short how sustained and successful were the individual phases of European occupation by Lower Palaeolithic hominins and what sorts of human where they Using a season by season chapter structure to explore for example the contrasting demands and opportunities of winter versus summer survival Hosfield explores how foods and other resources would vary across the four seasons in quantity and quality and the resulting implications for hominin behaviours Text boxes provide the background on key issues and the book draws on a range of supporting evidence including technology e g the nature of Lower Palaeolithic stone tools the evidence for organic tools hominin life history e g the length of infant dependency the nature of parenting the implications of different mating models the Social Brain Hypothesis cognitive studies e g brain scanning research into possible planning capabilities and potential bias in the archaeological record e g in terms of what is and isn't preserved By testing the likelihood of different scenarios by comparing short term site based insights with long term regional trends Hosfield is able to put forward ideas on how our earliest European ancestors survived and what their lives were like

The Oxford Handbook of Cognitive Archaeology, 2024-03-12 Cognitive Archaeology is a relatively young though fast growing discipline The intellectual heart of cognitive archaeology is archaeology the discipline that investigates the only direct evidence of the actions and decisions of prehistoric people Its theories and methods are an eclectic mix of psychological neuroscientific paleoneurological philosophical anthropological ethnographic comparative aesthetic and experimental theories methods and models united only by their focus on cognition The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the

Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations Significantly the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium These examples include the gamut of methods and techniques including typology replication studies changes opératoires neuroarchaeology ethnographic comparison and the direct historical approach In addition the book begins with retrospective essays by several of the pioneers of cognitive archaeology presenting a broad range of state of the art investigations into cognitive abilities tackling thorny issues like the cognitive status of Neandertals and concluding with speculative essays about the future of an archaeology of mind and of the mind itself Cognitive Models in Palaeolithic Archaeology Thomas Grant Wynn, Frederick Lawrence Coolidge, 2017 Cognitive Models in Palaeolithic Archaeology grew out of a specialized thematic session that we organized for the 2013 meeting of the European Society for the Study of Human Evolution Preface Alcohol and Humans Kimberley Hockings, Robin Ian MacDonald Dunbar, 2020 Alcohol use has a long and ubiquitous history This fascinating multi disciplinary volume examines the broad use of alcohol in the human lineage and its wider relationship to social contexts such as feasting sacred rituals and social bonding

Ancient Oaxaca Richard E. Blanton, Gary M. Feinman, Stephen A. Kowalewski, Linda M. Nicholas, 2022-07-28 Over two thousand years ago Oaxaca Mexico was the site of one of the New World's earliest episodes of primary state formation and urbanism and today it is one of the world's archaeologically best studied regions This volume which thoroughly revises and updates the first edition provides a highly readable yet comprehensive path to acquaint readers with one of the earliest and best known examples of Native American state formation and its consequences as seen from the perspectives of urbanism technology demography commerce households and religion and ritual Written by prominent archaeological researchers who have devoted decades to Oaxacan research and to the development of suitable social theory the book places ancient Oaxaca within the context of the history of ideas that have addressed the causes and consequences of social evolutionary change It also critically evaluates the potential applicability of more recent thinking about state building grounded in collective action and related theories The Psychology of Political Behavior in a Time of Change Jan D. Sinnott, Joan S. Rabin, 2020-10-23 This volume seeks to add a unique perspective on the complex relationship between psychology and politics focusing on three analytical points of view 1 psychology politics and complex thought 2 bio psycho social factors of masculinity and power and 3 underlying factors in political behavior Contributors examine recent political events worldwide through a psychological lens using interdisciplinary approaches to seek a deeper understanding of contemporary political ideas psychologies and behaviors Finally the book offers suggestions for surviving and thriving during rapid political change Among the topics discussed Biopsychological factors of political beliefs and behaviors Understanding political polarization through a cognitive lens Impact of psychological processes on voter decision making Motivations for believing in conspiracy theories Nonverbal

cues in leadership Authoritarian responses to social change The Psychology of Political Behavior in a Time of Change is a timely and insightful volume for students and researchers in psychology political science gender studies business and marketing and sociology as well as those working in applied settings practitioners government workers NGOs corporate organizations The Colobines Ikki Matsuda, Cyril C. Grueter, Julie A. Teichroeb, 2022-02-24 Covering colobine biology behaviour ecology and conservation this book summarises current knowledge of this fascinating group of primates *The Kurds and the Politics of Turkey* Deniz Çifçi, 2019-08-08 The Kurds constitute the largest stateless nation in the world Their position in Turkey attracts attention both within the country and internationally particularly focusing on the demand for Kurdish independence Yet since the 1990s new Kurdish parties have formed within Turkey who have a variety of ideologies and demands that go beyond and differ in opinion on the question of independence Much of the present literature on the topic looks at the Kurds of Turkey as a homogenous group with unified political demands which over simplifies their position within the political backdrop of Turkey This book seeks to provide nuance and depth to the current debate on Kurdish political agency and presence in Turkey Presently the Kurds political demands can be classified into four categories democratic autonomy their cultural rights to be granted federalism territorial autonomies and independence creation of a Kurdish nation state In a broad sense these models can also be ordered into two categories territorial political models federalism and independence and non territorial political models democratic autonomy and cultural rights Considering the diversity within the Kurdish community intertwinement of tribal ethnic and national identity and differences in their language religion and ideology there are several contributing factors for the emergence of the current varied political demands of Kurds By explaining variation among the Kurds political demands through close analysis of existing at emerging parties this study challenges a deterministic approach to the Kurds which currently dominates the discourse **Human Evolution** Robin Dunbar, 2014-05-01 What makes us human How did we develop language thought and culture Why did we survive and other human species fail The past 12 000 years represent the only time in the sweep of human history when there has been only one human species How did this extraordinary proliferation of species come about and then go extinct And why did we emerge such intellectual giants The tale of our origins has inevitably been told through the stones and bones of the archaeological record yet Robin Dunbar shows it was our social and cognitive changes rather than our physical development which truly made us distinct from other species *The Oxford Handbook of Ethics and Economics* Mark D. White, 2019-06-06 Economics and ethics are both valuable tools for analyzing the behavior and actions of human beings and institutions Adam Smith the father of modern economics considered them two sides of the same coin but since economics was formalized and mathematicised in the late 1800s and early 1900s the fields have largely followed separate paths The Oxford Handbook of Ethics and Economics provides a timely and thorough survey of the various ways ethics can do and should inform economic theory and practice The first part of the book Foundations explores how the most prominent schools

of moral philosophy relate to economics asks how morals relevant to economic behavior may have evolved and explains how various approaches to economics incorporate ethics into their work The second part Applications looks at the ethics of commerce finance and markets uncovers the moral dilemmas involved with making decisions regarding social welfare risk and harm to others and explores how ethics is relevant to major topics within economics such as health care and the environment With esteemed contributors from economics and philosophy The Oxford Handbook of Ethics and Economics is a resource for scholars in both disciplines and those in related fields It highlights the close relationship between ethics and economics in the past while and lays a foundation for further integration going forward

The Social Archaeology of the Levant Assaf Yasur-Landau, Eric H. Cline, Yorke Rowan, 2018-12-20 The volume offers a comprehensive introduction to the archaeology of the southern Levant modern day Israel Palestine and Jordan from the Paleolithic period to the Islamic era presenting the past with chronological changes from hunter gatherers to empires Written by an international team of scholars in the fields of archaeology epigraphy and bioanthropology the volume presents central debates around a range of archaeological issues including gender ritual the creation of alphabets and early writing biblical periods archaeometallurgy looting and maritime trade Collectively the essays also engage diverse theoretical approaches to demonstrate the multi vocal nature of studying the past Significantly The Social Archaeology of the Levant updates and contextualizes major shifts in archaeological interpretation

Evolutionary Perspectives on Imaginative Culture Joseph Carroll, Mathias Clasen, Emelie Jonsson, 2020-08-28 This pioneering volume offers an expansive introduction to the relatively new field of evolutionary studies in imaginative culture Contributors from psychology neuroscience anthropology and the humanities probe the evolved human imagination and its artefacts The book forcefully demonstrates that imagination is part of human nature Contributors explore imaginative culture in seven main areas Imagination Evolution Mechanisms and Functions Myth and Religion Aesthetic Theory Music Visual and Plastic Arts Video Games and Films Oral Narratives and Literature Evolutionary Perspectives on Imaginative Culture widens the scope of evolutionary cultural theory to include much of what culture means in common usage The contributors aim to convince scholars in both the humanities and the evolutionary human sciences that biology and imaginative culture are intimately intertwined The contributors illuminate this broad theoretical argument with comprehensive insights into religion ideology personal identity and many particular works of art music literature film and digital media The chapters Imagination the Brain's Default Mode Network and Imaginative Verbal Artifacts and The Role of Aesthetic Style in Alleviating Anxiety About the Future are licensed under the terms of the Creative Commons Attribution 4.0 International License <http://creativecommons.org/licenses/by/4.0/>

Framing Complexity in Formative Mesoamerica Lisa Delancey, Gary M. Feinman, 2022-09-28 A fresh examination of variable social and economic processes Framing Complexity in Formative Mesoamerica explores nascent social complexity during the Preclassic Formative period in Mesoamerica and addresses broader social questions about egalitarian and transegalitarian prehispanic Mesoamerican cultural groups

Contributors present multiple lines of evidence demonstrating the process of social complexity and reconsider a number of traditionally accepted models and presumed tenets as a result of the wealth of empirical data that has been gathered over the past four decades. Their chapters approach complexity as a process rather than a state of being by exploring social aggregation, the emergence of ethnic affiliations, and aspects of regional and macroregional variability. *Framing Complexity in Formative Mesoamerica* presents some of the most recent data and the implications of that data for understanding the development of complex societies as human beings moved into urban environments. The book is an especially important volume for researchers and students working in Mesoamerica as well as archaeologists taking a comparative approach to questions of complexity.
