**Authentic Reconstruction** John Bold, Peter Larkham, Robert Pickard, 2017-12-14 Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment These questions are most pertinent when buildings have been destroyed in disaster or war and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost *Authentic Reconstruction* examines this idea of reconstruction using it as a prompt to examine a range of deeper issues on heritage and the built environment From post WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters this collection of essays by heritage specialists provides a wide range of case studies and discussions Each presents responses to crises and lessons learned in order to extrapolate general guidelines for future actions by politicians architects and planners in reconstructing buildings The book also looks beyond disaster and war noting how authenticity bears on political intentions and image building exploring how reconstruction is used to tell a political or historical story so conditioning the ways in which the built environment is perceived and appreciated by its users This is not just about the buildings as bricks and mortar but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population This book will be valuable to all who are concerned with heritage as practitioners or consumers particularly those concerned with reconstruction and the creation of authentic places and

Stern,2009-11-01 This volume The New Social Studies People Projects and Perspectives is not an attempt to be the comprehensive book on the era Given the sheer number of projects that task would be impossible However the current lack of knowledge about the politics people and projects of the NSS is unfortunate as it often appears that new scholars are reinventing the wheel due to their lack of knowledge about the history of the social studies field The goal of this book then is to sample the projects and individuals involved with the New Social Studies NSS in an attempt to provide an understanding of what came before and to suggest guidance to those concerned with social studies reform in the future especially in light of the standardization of curriculum and assessment currently underway in many states The authors who contributed to this project were recruited with several goals in mind including a broad range of ages interests and experiences with the NSS from participants during the NSS era through new young scholars who had never heard much about the NSS As many of the authors remind us in their chapters much has been written of the failure of the NSS However in every chapter of this book the authors also point out the remnants of the projects that remain Crime Reconstruction W.
