Farm health and productivity management of dairy young stock Siert-Jan Boersema, Joao Cannas da Silva, John Mee, Jos Noordhuizen, 2023-09-04 The rearing of young stock until calving is often neglected on dairy farms compared to the management of adult cattle It is often not realized that young stock represent a critical investment in the future of the dairy farm and that sufficient attention should be paid to the rearing period to safeguard that investment and to gain efficiency Optimal weight gain and health during rearing are essential The

ultimate goals are that the heifer after her first calving enters into milk production to her fullest genetic potential and that she will have an optimal health and longevity in the herd A population medicine approach is used to focus on healthy animals which bring profit rather than costs Practical tools are provided to manage the complexity of young stock rearing This approach provides the farmer with structure planning organisation and coaching Risk identification and risk management like in bio security and in quality risk management are key aspects of the population medicine approach Practical examples are added to illustrate the points Finally a section on diseases in young stock is added as a quick reference guide This book is a valuable reference for practising veterinarians herd health practitioners extension officers and other farm advisors as well as dairy farmers

Engineering Practices for Milk Products Megh R. Goyal, Subrota Hati, 2019-09-30 While also addressing the need for more effective processing technologies for increased safety and quantity the dairy industry needs to address the growing customer demand for new and innovative dairy foods with enhanced nutritional value This volume looks at new research technology and applications in the engineering of milk products specifically covering functional bioactivities to add value while increasing the quality and safety of milk and fermented milk products Chapters in the book look at the functional properties of milk proteins and cheese functional fermented milk based beverages biofunctional yoghurt antibiotic resistant pathogens and other probiotics in dairy food products
