Congress. House. Committee on Homeland Security. Subcommittee on Transportation Security and Infrastructure Protection, 2011 **Airspace Closure and Civil Aviation** Steven D. Jaffe, 2016-03-03 The impact to airlines from airspace closure can be as benign as a two minute extension on an arrival pattern or as catastrophic

as a shoot down from a surface to air missile as the tragic loss of Malaysia Airlines Flight 17 over the Ukraine in July 2014 demonstrates. Airspace constraints come in a variety of forms both man made and physical but all result in operational inefficiencies that erode the economic vitality of an airline. Understanding the root causes of these airspace restrictions, developing strategies for mitigating their impact and anticipating future airspace closures are critical for the efficient and safe operation of any airline. This book uniquely examines the technological, geographic, regulatory and political aspects of airspace closure with a focus on how airlines continue to adapt to overcome these challenges, providing readers with a framework for identifying issues and solutions in a systematic manner. Filled with historical references and contemporary anecdotes, this book serves both as a practical guide and strategic resource for airline managers navigating their 21st century organizations around some of the lingering 20th century obstacles.

This book uses numerous examples to describe the current opportunities and risks of air freight against the backdrop of stagnating transport volumes since the financial crisis in 2008. It shows what impact these developments have had on those involved in particular: shippers, airlines, airports and freight forwarders. The application oriented presentation also provides an insight into the design of complex supply chains and the areas of tension in which the players in air freight operate.
