collection of quirky essays is unified by its primary concern to examine the way people perceive and think **Encounters with Gurdjieff** David Hughes, 2016-12-27 This is an unexpected input from the remarkable mystical teacher George Ivanovitch Gurdjieff over thirty years after his passing in 1949 A method of transmission was devised through a trance medium with multiple means for pursuing and checking the authenticity of the material and demonstrating the validity of the explanations provided The information given is linked with clues in the published corpus of available teachings and backed by research into ancient sources of what Gurdjieff knew It comes with the intriguing stories of how both the author found himself involved in the project and Gurdjieff's explanation of why he had to resort to such a means of communication Much of the mystery surrounding the man and his mission is unpacked and many things about his life and work are revealed for the first time We get a fuller picture at last of what he was trying to achieve during his lifetime Special groups were set up by Gurdjieff before his passing to protect his writings and disseminate his teachings when he was no longer here Many groups in many countries still carry on that work What Gurdjieff addresses in the message of this book is the incompleteness of what he was able to pass on by that means His students simply weren't ready to receive all he had to give to them What couldn't be directly said or grasped was hidden in his enigmatic writings At some future time those messages would need to be revealed This book is part of that process Followers of Gurdjieff will find invaluable updated teaching here Those previously unacquainted with him will nevertheless find a reliable path to self development *The Balance, and Columbian Repository*, 1806 **The Saturday Evening Post**, 1928 **Advances in Teacher Emotion Research** Paul A. Schutz, Michalinos Zembylas, 2009-08-14 Some reports estimate that nearly 50% of teachers entering the profession leave within the first five years Alliance for Excellent Education 2004 Ingersoll 2003 Quality Counts 2000 One explanation of why teachers leave the profession so early in their career might be related to the emotional nature of the teaching profession For example teaching is an occupation that involves considerable emotional labor Emotional labor involves the effort planning and control teachers need to express organizationally desired emotions during interpersonal transactions As such emotional labor has been associated with job dissatisfaction health symptoms and emotional exhaustion which are key components of burnout and related to teachers who drop out of the profession Research into emotional labor in teaching and other aspects of teachers' emotions is becoming increasingly important not only because of the growing number of teachers leaving the profession but also because unpleasant classroom emotions have considerable implications for student learning school climate and the quality of education in general Using a variety of different methodological and theoretical approaches the authors in this edited volume *Advances in Teacher Emotion Research: The Impact on Teachers' Lives* provide a systematic overview that enriches our understanding of the role of emotions in teachers' professional lives and work More specifically the authors discuss inquiry related to teachers' emotions in educational reform teacher identity student involvement race class gender issues school administration and inspection emotional labor teacher burnout and several other related issues This volume

then represents the accumulation of different epistemological and theoretical positions related to inquiry on teachers emotions acknowledging that emotions are core components of teachers lives Advances in Teacher Emotion Research takes an eclectic look at teacher emotions presenting current research from diverse perspectives thereby making this volume a significant contribution to the field
