How To Build A Chopper:

How to Build a Cheap Chopper Timothy Remus, Wolfgang Publications Inc, 2004 Choppers don't have to cost thirty thousand dollars. In fact, a chopper built at home can be had for as little as five thousand dollars. The key is the use of a donor bike for most of the components. **How to Build a Cheap Chopper** documents the construction of four inexpensive choppers with complete start to finish photo sequences. Least expensive is the metric chopper based on a 1970s vintage Japanese four cylinder engine and transmission installed in a hardtail frame. Don't look for billet accessories or a fancy candy paint job on this one. Next up price wise are two bikes built using Buell Sportster drivetrains. The fact is a complete used Buell or Sportster can be had for thousand dollars or less. Now you've got more than an engine, you have wheels and tires, brakes, hardware, lights, harness, and some sheet metal. Bolt all that stuff to a simple hardtail frame to create an almost instant chopper. Most lavish but still cheap by comparison with many of the bikes built today is a big twin chopper built from carefully chosen aftermarket parts. A RevTech engine and five speed tranny set in a Rolling Thunder frame. Accessorize from the swap meet and add a simple one color paint job to create a bike no one needs to be ashamed of.

How to Build a Bobber on a Budget Jose de Miguel, 2008-02-15 In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know how, and a creative vision. But with the rise of the high dollar haute moteur Gucci choppers, the true custom bike has gotten out of most riders reach. Right Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one off motorcycle parts and make a cheap run of the mill custom build into a drop dead show stopper. Following de Miguel's lead along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and most importantly, a modicum of imagination, can build the bobber of his dreams for less than the price of a new bike.

How to Build a West Coast Chopper Kit Bike Mike Seate, This book presents a step by step guide to building a West Coast Chopper's C F L kit. Kit choppers are hot commodities. While few people can afford to buy a custom built chopper from one of the high end builders like Jesse James bikes that often sell for 100 000 or more, many can afford to buy such bikes in kit form. Because of this, all the high end builders sell their creations in kit form. For example, while Jesse James might build perhaps a dozen custom bikes per year, he sells hundreds of chopper kits. The same is true of any number of other builders like Matt Hotch, Cyril Huze, and Paul Yaffe. Authored by Mike Seate and featuring the photography of Joe Appel, this book is a step by step how to guide for anyone building a kit chopper.

How to Build a Chopper Timothy Remus, 2017-11-08 Choppers are hot again. All you need to decide is what style you want, and this book will guide you through the building sequences. It shows how to build a genuine old chopper or a chopper that looks old and has the conveniences of today, such as electric start and functioning brakes.
