**CGI Programming with Perl** Scott Guelich, Shishir Gundavaram, Gunther Birznieks, 2000-06-29 Programming on the Web today can involve any of several technologies but the Common Gateway Interface CGI has held its ground as the most mature method and one of the most powerful ones of providing dynamic web content CGI is a generic interface for calling external programs to crunch numbers query databases generate customized graphics or perform any other server side task There was a time when CGI was the only game in town for server side programming today although we have ASP PHP Java servlets and ColdFusion among others CGI continues to be the most ubiquitous server side technology on the Web CGI programs can be written in any programming language but Perl is by far the most popular language for CGI Initially developed over a decade ago for text processing Perl has evolved into a powerful object oriented language while retaining its simplicity of use CGI programmers appreciate Perl's text manipulation features and its CGI.pm module which gives a well integrated object oriented interface to practically all CGI related tasks While other languages might be more elegant or more efficient Perl is still considered the primary language for CGI CGI Programming with Perl Second Edition offers a comprehensive explanation of using CGI to serve dynamic web content Based on the best selling CGI Programming on the World Wide Web this edition has been completely rewritten to demonstrate current techniques available with the CGI.pm module and the latest versions of Perl The book starts at the beginning by explaining how CGI works and then moves swiftly into the subtle details of developing CGI programs Topics include Incorporating JavaScript for form validation Controlling browser caching Making CGI scripts secure in Perl Working with databases Creating simple search engines Maintaining state between multiple sessions Generating graphics dynamically Improving performance of your CGI scripts

*Hands-On Image Processing with Python* Sandipan Dey, 2018-11-30 Explore the mathematical computations and algorithms for image processing using popular Python tools and frameworks Key Features Practical coverage of every image processing task with popular Python libraries Includes topics such as pseudo coloring noise smoothing computing image descriptors Covers popular machine learning and deep learning

techniques for complex image processing tasks

**Book Description** Image processing plays an important role in our daily lives with various applications such as in social media face detection medical imaging X ray CT scan security fingerprint recognition to robotics space This book will touch the core of image processing from concepts to code using Python The book will start from the classical image processing techniques and explore the evolution of image processing algorithms up to the recent advances in image processing or computer vision with deep learning We will learn how to use image processing libraries such as PIL scikit image and scipy ndimage in Python This book will enable us to write code snippets in Python 3 and quickly implement complex image processing algorithms such as image enhancement filtering segmentation object detection and classification We will be able to use machine learning models using the scikit learn library and later explore deep CNN such as VGG 19 with Keras and we will also use an end to end deep learning model called YOLO for object detection We will also cover a few advanced problems such as image inpainting gradient blending variational denoising seam carving quilting and morphing By the end of this book we will have learned to implement various algorithms for efficient image processing

**What you will learn** Perform basic data pre processing tasks such as image denoising and spatial filtering in Python Implement Fast Fourier Transform FFT and Frequency domain filters e g Weiner in Python Do morphological image processing and segment images with different algorithms Learn techniques to extract features from images and match images Write Python code to implement supervised unsupervised machine learning algorithms for image processing Use deep learning models for image classification segmentation object detection and style transfer

**Who this book is for** This book is for Computer Vision Engineers and machine learning developers who are good with Python programming and want to explore details and complexities of image processing No prior knowledge of the image processing techniques is expected

**More iPhone Cool**

**Projects** Ben Smith,Danton Chin,Leon Palm,Dave Smith,Charles Smith,Claus Hoefele,Saul Mora,Arne de Vries,Joost van de Wijgerd,Scott Penberthy,Ben Kazez,Roderick Smith,Stephen Chin,2010-07-30 Everyone is developing iPhone applications and it s clear why The iPhone is the coolest mobile device available and the App Store makes it simple to get an application out into the unstoppable iPhone app market With hundreds of thousands of app developers entering the game it s crucial to learn from those who have actually succeeded This book shows you how some of the most innovative and creative iPhone application developers have developed cool best selling apps Not only does every successful application have a story but behind every great app is excellent code In this book you ll see the code and learn how to use it to make your own cool applications You ll learn everything from importing 3D art assets into your iPhone game to using Cocos2d for iPhone and iPad This book shares the secrets of the coolest iPhone apps being built today by the best iPhone developers invaluable knowledge for anyone who wants to create the app that everyone is talking about
