The Entanglement Alva Noë,2025-02-25 Why human nature is an aesthetic phenomenon and why we need art and philosophy to understand ourselves In *The Entanglement* philosopher Alva Noë explores the inseparability of life art and philosophy arguing that we have greatly underestimated what this entangled reality means for understanding human nature Life supplies art with its raw materials but art Noë argues remakes life by giving us resources to live differently Our lives are permeated with the aesthetic Indeed human nature is an aesthetic phenomenon and art our most direct and authentic way of engaging the aesthetic is the truest way of understanding ourselves All this suggests that human nature is not a natural phenomenon Neither biology cognitive science nor AI can tell a complete story of us and we can no more pin ourselves down than we can fix or settle on the meaning of an artwork Even more art and philosophy are the means to set ourselves free at least to some degree from convention habit technology culture and even biology In making these provocative claims Noë explores examples of entanglement in artworks and seeing writing and speech and choreography and dancing and examines a range of scientific efforts to explain the human Challenging the notions that art is a mere cultural curiosity and that philosophy has been outmoded by science *The Entanglement* offers a new way of thinking about human nature the limits of natural science in understanding the human and the essential role of art and philosophy in trying to know ourselves
