found that the Mallard and Muscovy that he hunted in the marshes and brought home to his family was a bird which could be  
domesticated One is not very certain about which particular civilization decided that duck brought up in your own farmyard  
was a good source of eating for the whole family Roast duck broiled duck duck with seasonings and herbs even wild duck  
along with their cousins the geese and the swans made excellent fare especially during times when other food resources  
were not so easily available Geese and swans are definitely not considered ducks though they belong to the same family The  
original ancestral species is the same even though the characteristics differ Geese and swans are larger in size and can be  
found in seawater as well as in freshwater Ducks are smaller in size but prefer freshwater habitats In the same manner you  
should not confuse ducks with other aquatic birds like divers coots and grebes All of them are good eating but they are  
unrelated except for their liking for water Apart from the meat content and eggs ducks have also been reared for their soft  
down Drakes are larger in size when compared to the female ducks Some of the popular species are Muscovy ducks Mallards  
Paradise Shelduck and Aylesbury The bills are long broad and sometimes they are serrated so that the ducks can feed on  
easily filtered aquatic plant and animal species A duck shoot has always been a popular occupation of people who enjoy  
hunting for gain especially when you are shooting these birds on the wing A duck cannot fly when it is molting and it  
normally molts before the duck group's migration to a warmer climate [The Das-Anjuli Diet](#) Dueep Jyoy Singh, John

Introduction When I was at college and naturally perpetually hungry because we were on the go physically and mentally from

6 in the morning to 2 o'clock at night those were the days my friend I heard about different food philosophies going back to ancient times especially as practiced in the East One of my friends was telling me about how her ancestors lived long and healthy productive lives for millenniums surviving on just 10 fistfuls she cupped her hands together and made a swallowing motion per meal That made up a healthy mouthful According to her this was practiced even today even in this day of plenty because according to them 10 fistfuls of food was enough to make a satisfying meal for you According to her throughout the day one did not go beyond 32 mouthfuls fistfuls Why 32 I queried Why not 31 or 33 or much much more than that Well she said 10 fistfuls per meal 3 meals per day and 2 extra for when you are really hungry

preparing you both physically and mentally for an injury free exercise The importance of a workout can be compared simply to the analogy of a car being driven in cold weather what people tend to do is allow their cars to warm up before picking up high speeds The same principle in a slightly modified sense applies to a workout For a strenuous and demanding workout its best to physically prepare yourself by steadily increasing the body s temperature with patience By giving your body a nice warm up with many of the techniques like jogging walking etc you are in fact improving blood circulation within different joints muscles and tendons much like oiling a squeaky wheel With the increased blood flow the heart rate also rises and the muscles warm up to prevent any injury from taking place Moreover warm up exercises also have a psychological affect and they prepare your brain by easing it into the physical activities that are soon to follow This is extremely helpful in exercises like weight lifting high intensity running and aerobics The body and mind thus synchronize and ease into the workout making sure that no part of the body faces any injury as a result of the exercises that are soon to follow Keep reading on and find out the details of a warm up
