

(1) Software & Software Engineering

Software:

- Computer software is the product that software professionals build and then support over the long term.
- It encompasses programs that execute within a computer of any size and architecture, content that is presented as the computer programs execute, and descriptive information in both hard copy and virtual forms that encompass virtually any electronic media.

Characteristics of software :

[1] **Software is developed or engineered:** it is not manufactured in the classical sense:

- Although some similarities exist between software development and hardware manufacturing, but few activities are fundamentally different.
- In both activities, high quality is achieved through good design, but the manufacturing phase for hardware can introduce quality problems than software.

[2] **Software doesn't wear out :**

- Hardware components suffer from the growing effects of dust, vibration, abuse, temperature extremes, and many other environmental maladies. Stated simply, the hardware begins to wear out.
- Software is not susceptible to the environmental maladies that cause hardware to wear out. In theory, therefore, the failure rate curve for software should take the form of the "idealized curve".
- When a hardware component wears out, it is replaced by a spare part.
- There are no software spare parts.
- Every software failure indicates an error in design or in the process through which design was translated into machine executable code.
- Therefore, the software maintenance tasks that accommodate requests for change involve considerably more complexity than hardware maintenance.
- However, the implication is clear—software doesn't wear out. But it does deteriorate.

How to Get the Grade

Without Doing the Work Charles Lanham, 2010-08-10 The one problem all students run into while they prepare for a test is not what you might think You might naturally assume that the problem is one of memory i e remembering the answers to the test but the real problem is what I call the Situation Effect In laymen terms our intelligence is composed of two halves the first being genetic the second being environmental e g diet sleep sociability etc and these two halves come together to form our current situation Therefore effects on either of these halves can help make or break our grades The only way to improve your situation is to learn how to make your brain happy and comfortable because when youre sad or stressed you will not function as well In fact some people are physically disfigured to a certain degree because they endured so much trial In this state of mind motor skills are frustrated and do not function like they should Also because of provoking anxiety ability to fight disease is infringed Above all your focus drive to succeed and mental activity are all incredibly bankrupt When theyre bad enough it feels like they dont even exist Therefore if you keep yourself as happy as possible you will study more effectively
