*A Minimal Metaphysics for Scientific Practice* Andreas Hüttemann, 2021-07-01 What are the metaphysical commitments which best make sense of our scientific practice rather than our scientific theories In this book Andreas Hüttemann provides a minimal metaphysics for scientific practice i e a metaphysics that refrains from postulating any structure that is explanatorily irrelevant Hüttemann closely analyses paradigmatic aspects of scientific practice such as prediction explanation and manipulation to consider the questions whether and if so what metaphysical presuppositions best account for these practices He looks at the role which scientific generalisation laws of nature play in predicting testing and explaining the behaviour of systems He also develops a theory of causation in terms of quasi inertial processes and interfering factors and he proposes an account of reductive practices that makes minimal metaphysical assumptions His book will be valuable for scholars and advanced students working in both philosophy of science and metaphysics
