The Cancer Answer Shé D'Montford, **Health For The Whole Person** Arthur C. Hastings,2019-03-13 This book presents attitudes information and tools for a holistic approach to medicine health and mental health In our discussions among ourselves and with the contributing authors we defined three aspects of a holistic approach First such an approach involves expanding our focus to include the many personal familial social and environmental factors that promote health prevent illness and encourage healing Second a holistic approach views the patient as an individual person not as a symptom bearing organism This attitude emphasizes the self responsibility of the person for his or her health and the importance of mobilizing the person s own health capacities rather than treating illness only from the outside Third the holistic approach tries to make wise use of the many diagnostic treatment and health modalities that are available in addition to the standard materia medica including alternative medical and healing systems as well as psychological techniques and physical modalities Some of these methods of treatment and health practices are already accepted others are accepted but not applied in practice and still others need further research to explore the range of their uses *The Truth About Diseases* Tihomir Petrov,2014-06-27 Usually a man creates his diseases In this book are explained the true causes for the diseases principles of natural hygienewhich must be kept to prevent diseasesand the way of treatment if they have occurred Natural hygiene uses holistic general way for treatment and maintenance of health They say that health is the greatest wealth Usually we realize the value of something when we lose it Health is not everything but everything without health is nothing Any theory is confirmed or rejected by practice Think well what is true theories that are taught in medical universities which are not based on natural laws or the theories based on natural laws and obvious facts If the wrong false theories which are taught in the medical universities that the causes for some diseases are autoimmune and other diseases are caused by viruses or bacteria were true most wild free animals in nature would also be suffering from the same diseases from which suffer people The truth is that very few of these animals get sick and it is usually due to disposal of poisons in nature by people The things are not so complicated as the doctors of the official medicine want to convince us Otherwise if there were at all live wild animals most of them would also be ill even if they had veterinary doctors dentists and doctors of pharmacy
