Movements that take issue with conventional understandings of autism spectrum disorder a developmental disability have become increasingly visible Drawing on more than three years of ethnographic fieldwork and interviews with participants Catherine Tan investigates two autism focused movements shedding new light on how members contest expert authority Examining their separate struggles to gain legitimacy and represent autistic people she develops a new account of the importance of social movements as spaces for constructing knowledge that aims to challenge dominant frameworks Spaces on the Spectrum examines the autistic rights and alternative biomedical movements which reimagine autism in different and conflicting ways as a difference to be accepted or as a sickness to treat Both however provide a window into how ideas that conflict with dominant beliefs develop take hold and persist The autistic rights movement is composed primarily of autistic adults who contend that autism is a natural human variation not a disorder and advocate for social and cultural inclusion and policy changes The alternative biomedical movement in contrast is dominated by parents and practitioners who believe in the disproven idea that vaccines trigger autism and seek to reverse it with scientifically unsupported treatments Both movements position themselves in opposition to researchers professionals and parents outside their communities Spaces on the Spectrum offers timely insights into the roles of shared identity and communal networks in movements that question scientific and medical authority

Unmasking Autism Devon Price, PhD, 2022-04-05 A deep dive into the spectrum of Autistic experience and the phenomenon of masked Autism giving individuals the tools to safely uncover their true selves while broadening society's narrow understanding of neurodiversity A remarkable work that will stand at the forefront of the neurodiversity movement Barry M Prizant PhD CCC SLP author of Uniquely Human A Different Way of Seeing Autism For every visibly Autistic person you meet there are countless masked Autistic people who pass as neurotypical Masking is a common coping mechanism in which Autistic people hide their identifiably Autistic traits in order to fit in with societal norms adopting a superficial personality at the expense of their mental health This can include suppressing harmless stims papering over communication challenges by presenting as unassuming and mild mannered and forcing themselves into situations that cause severe anxiety all so they aren't seen as needy or odd In Unmasking Autism Dr Devon Price shares his personal experience with masking and blends history social science research prescriptions and personal profiles to tell a story of neurodivergence that has thus far been dominated by those on the outside looking in For Dr Price and many others Autism is a deep source of uniqueness and beauty Unfortunately living in a neurotypical world means it can also be a source of incredible alienation and pain Most masked Autistic individuals struggle for decades before discovering who they truly are They are also more likely to be marginalized in

terms of race gender sexual orientation class and other factors which contributes to their suffering and invisibility Dr Price lays the groundwork for unmasking and offers exercises that encourage self expression including Celebrating special interests Cultivating Autistic relationships Reframing Autistic stereotypes And rediscovering your values It s time to honor the needs diversity and unique strengths of Autistic people so that they no longer have to mask and it s time for greater public acceptance and accommodation of difference In embracing neurodiversity we can all reap the rewards of nonconformity and learn to live authentically Autistic and neurotypical people alike

I Will Die On This Hill

Meghan Ashburn,Jules Edwards,2023-01-19 There is a significant divide between autistic advocates and parents of autistic children Parents may feel attacked for their lack of understanding and autistic adults who offer insight and guidance are also met with hostility and rejection Meghan Ashburn a mother of two autistic boys and Jules Edwards an autistic parent were no strangers to this tension and had an adversarial relationship when they first met Over time the two resolved their differences and are now co conspirators in the pursuit of disability justice This book unites both perspectives exploring the rift between these communities and encouraging them to work towards a common goal It provides context to dividing issues and the authors use their experience to illustrate where they ve messed up where they ve got things right and what they ve learned along the way

Self-Face Recognition and the Brain

Julian Paul Keenan,Karina Quevedo,William D. Hopkins,2023-08-31 Self Face Recognition and the Brain explores a fundamental cornerstone of human consciousness how recognizing ourselves leads to a better understanding of the brain and higher order thinking Featuring contributions from an interdisciplinary range of researchers each chapter provides a unique insight into one aspect of self face recognition The book begins by introducing readers to the concept of self face recognition covering issues like the mirror test and whether animals can

recognize themselves before addressing the role of neural correlates and attempts at localizing consciousness. It then discusses various disorders and the impact they can have on self face recognition before considering how neuroscience can heighten our understanding of the field. It will be an essential read for all researchers of self face recognition from psychology, philosophy and neuroscience backgrounds.

The Autistic Spectrum Jill Boucher, 2008-11-13. The author of this excellent new book states in the preface that she intended to provide an account of autism that people with little or no specialist knowledge will find comprehensible and digestible but which at the same time offers more advanced readers a clear summary of existing knowledge. In my opinion she has achieved her stated goal in a most impressive volume which does justice to the complexity of the subject covered without being over long or alienating the less knowledgeable reader. This is no mean feat as the book covers topics as disparate as the potential genetic cause of autism and the principle of inclusive care as applied to people with autism. The result is a handbook which I would have no hesitation in recommending to an intelligent parent of a child with autism, a teacher and undergraduate student or a clinical trainee. In fact I feel that this book has something to offer even a supposed expert in the study of autism since it so neatly synthesises historic and current understanding of the condition, a thoughtfully written book which makes a modern, thorough and readable account of a complex and intriguing condition.

Autism: This is an authoritative, accessible and original approach to our current understanding of autistic spectrum disorders. Rita Jordan PhD, Emeritus Professor in Autism Studies, University of Birmingham. Jill Boucher is a leading academic and clinician who brings an individual and authoritative perspective to the autism field. In this book she does an excellent job of communicating a broad range of practical as well as theoretical issues to a general audience, making up to date information about this puzzling condition accessible to a wide readership. Boucher's book is a welcome and unique addition to the literature.

Tony Charman, Professor of Neurodevelopmental Disorders, University College of London. What are the historical foundations of autism and what precisely is meant by the autistic spectrum? How can we explain behavioural patterns of people with autism, young or old, and what are the major theoretical bases for understanding these? What is the latest thinking regarding diagnosis and what are the most effective strategies for assessment, education and care for people with this condition? This provocative new text sets out to answer these questions. It charts developments in understanding the nature and causes of autistic spectrum disorders, guiding students through theories at the psychological, neurobiological and first cause levels to methods of assessment, intervention, education and support. Written as an introductory text for those with little prior knowledge of autism but also as a source of basic information and references for those already familiar with the field, this book will be invaluable for a broad range of vocational and academic students and for parents and professionals who want an account of current facts and theories.

Jill Boucher is Professor in the Autism Research Unit at City University and Honorary Professor of Psychology at Warwick University.

Coming Out of Invisibility Rosângela M. Maldonado, For a long time society has imposed an invisible role on autistic women underestimating their abilities ignoring their potential and limiting their opportunities This scenario of misunderstanding and misinformation has caused many women on the spectrum to grow up without a clear reference about who they really are feeling out of place and often unable to take their place in the world But it's time to change this *Coming Out of Invisibility: The Empowerment of Autistic Women* is an invitation for every woman on the autistic spectrum to start seeing herself with more affection respect and pride The first step to a full and fulfilled life is self discovery It is understanding that being autistic is not a limitation but a unique and powerful way of existing in the world In this book we address the importance of breaking with internal prejudices reformulating beliefs about oneself and developing a more positive and empowering vision of one's own identity After all each autistic woman carries within herself a unique set of qualities skills and abilities that need to be recognized and valued first and foremost by herself Here we talk about the essential foundations for this transformation Self knowledge understanding who you are how your mind works and how your perceptions shape your reality Self acceptance embracing your autistic identity with love and without guilt Personal empowerment recognizing your own value and freeing yourself from the limiting expectations imposed by the neurotypical world Changing beliefs replacing negative and limiting ideas with an empowering and realistic vision of yourself Building your own path creating a life model aligned with your interests needs and dreams Transformation is an internal process No true change can happen from the outside in it is the autistic woman herself who must take the reins of her journey and allow herself to be who she really is This book was written to help her on this journey offering reflections strategies and practical tools so that each reader can achieve her freedom self confidence

and autonomy Come out of invisibility The world needs you but first and foremost YOU need you *The Qualified Self* Lee Humphreys,2018-04-13 How sharing the mundane details of daily life did not start with Facebook Twitter and YouTube but with pocket diaries photo albums and baby books Social critiques argue that social media have made us narcissistic that Facebook Twitter Instagram and YouTube are all vehicles for me promotion In *The Qualified Self* Lee Humphreys offers a different view She shows that sharing the mundane details of our lives what we ate for lunch where we went on vacation who dropped in for a visit didn't begin with mobile devices and social media People have used media to catalog and share their lives for several centuries Pocket diaries photo albums and baby books are the predigital precursors of today's digital and mobile platforms for posting text and images The ability to take selfies has not turned us into needy narcissists it's part of a longer story about how people account for everyday life Humphreys refers to diaries in which eighteenth century daily life is documented with the brevity and precision of a tweet and cites a nineteenth century travel diary in which a young woman complains that her breakfast didn't agree with her Diaries Humphreys explains were often written to be shared with family and friends Pocket diaries were as mobile as smartphones allowing the diarist to record life in real time Humphreys calls this chronicling in both digital and nondigital forms media accounting The sense of self that emerges from media accounting is not the purely statistics driven quantified self but the more well rounded qualified self We come to understand ourselves in a new way through the representations of ourselves that we create to be consumed *Is This Autism?* Donna

Henderson,Sarah Wayland,Jamell White,2023-07-25 This companion guide to *Is This Autism A Guide for Clinicians and Everyone Else* shows clinicians how to assess for the possibility of autism in clients of all ages Understanding of autism has greatly expanded in recent years and many clinicians feel ill equipped or confused about how to incorporate this knowledge into their diagnostic process As a result countless unidentified autistic people do not have reasonable access to proper identification or support This book describes current assessment methods including interviewing rating scales self report measures social cognition tests and behavioral observations It also provides guidance regarding cultural considerations common mistakes and how to communicate with and support clients through the diagnostic process This very practical clinical guide provides a clear and neurodiversity affirmative approach to autism assessment particularly for autistic individuals who have previously been missed It is relevant to all healthcare professionals who want to learn how to identify autism in their clients **The Lost Self** Todd E. Feinberg M.D.,Julian Paul Keenan,2005-07-14 The *Lost Self* Pathologies of the Brain and Identity is an in depth exploration into one of the most mysterious and controversial topics in neuroscience

neurology psychiatry and psychology namely the search for the biological basis of the self The *Lost Self* is a guide to understanding how the brain creates who we are and what happens when things go wrong **Understanding the Boundary between Disability Studies and Special Education through Consilience, Self-Study, and Radical Love** David I. Hernández-Saca,Holly Pearson,Catherine Kramarczuk Voulgarides,2022-12-13 In *Understanding the Boundary*

between Disability Studies and Special Education through Consilience Self Study and Radical Love the authors explore what it means to engage in boundary work at the intersection of traditional special education systems and critical disability studies in education The book consists of fifteen groundbreaking accounts that challenge dominant medicalized discourses about what it means to exist within and around special education systems that create space for new conceptions of what it means to teach lead learn and exist within a conciliatory space driven by radical love and disability justice principles The book pushes readers to consider how their own personal professional and programmatic future transformational actions can be driven by disruption and the desire for freedom from the hegemony of traditional special education and White and Ability supremacy

The Pedagogy of Self-Authorship Philip R. Hulbig, 2023-10-14 This book is a deep dive into the developmental and neurocognitive impact of metacognition and its role in self transformation It connects the latest science on learning neuroplasticity and self development with the rich history of metacognitive educational practices creating an educational vision capable to address difficult issues faced by modern education This vision highlights self regulation self authorship and self transformation as the key learning goals of a free and equitable education system This model of education is grounded in science problem solving and is capable of addressing the needs of a neurologically diverse humanity Interviews from experts at Program for the Advancement of Learning PAL are integrated with the author autobiographical account of their transformative learning experience to provide evidence on the effectiveness of utilizing a metacognitive pedagogy in promoting transformative learning The book concludes with a general pedagogy of metacognitive instruction that integrates the scientific method with the development of an individual s theory of mind to induce expansive personal development and achievement This book would be of interest to educators and scholars as well as practitioners supporting neurodivergent students and employees neurodiversity advocates and critical disability studies researchers
