Privity of Contract in International Investment Arbitration Martina Magnarelli,2020-05-21 Is privity of contract the reason why investor state dispute settlement ISDS is open to critics or could it contribute to solving the system s legitimacy crisis Privity of contract essentially means that a subject must be a party to a contract in order to acquire rights and assume obligations to sue and be sued under that contract Privity of contract came to land on the shores of ISDS and this has at least on one occasion been described as an original sin Arbitral tribunals often need to decide whether they have jurisdiction in cases where a party to the investment contract is not the claimant but a related entity or not the central government but a state agency or state owned enterprise In light of the deep interconnection between on the one hand the criticism today surrounding investment treaty arbitration be it called judicial activism and regulatory chill or be it called abuse of law and indirect claims and on the other hand the domains where privity of contract applies this book s original and far reaching analysis clearly lays out via an in depth examination of relevant case law a possible use of the doctrine that can

contribute to leading ISDS out of the crisis The study s conclusions respond with thoroughly researched authority to such key questions as the following In which domains of international investment arbitration does the notion of privity of contract operate and with what effects How are states and arbitral panels reacting to the persisting unresolved issues raised by the increasing pertinence of this legal doctrine What solutions are advisable in the midst of the current criticisms surrounding ISDS The author finds that the doctrine of privity of contract finds application in heterogeneous scenarios from decisions on jurisdiction where there are forum selection clauses in investment contracts or fork in the road provisions in investment treaties to consolidation counterclaims and umbrella clause claims She proposes a flexible interpretation of the doctrine of privity of contract as a guiding principle arbitral tribunals should consider along with other factors inter alia the tightness of the relation between the investor and its subsidiary and the host state s involvement in the organization and function of agencies or state owned enterprises The book s thorough and extensive examination of investment arbitration case law draws comparisons with other international adjudicatory bodies and identifies the most actual and compelling unresolved legal issues Appendices include lists of many of the arbitration cases international judgments and national judgments discussed As a constructive contribution to the current debate this enquiry is an extraordinary achievement No other study has conducted such thorough research on the application of privity of contract in investment treaty arbitration It will be of great interest to arbitration lawyers arbitrators foreign investors host states and scholars in all areas of international arbitration and dispute settlement
