Gilbert-Kawai, Marc D. Wittenberg, 2014-05-08 A sound knowledge of equations and their use derivation and clinical application is an absolute prerequisite for any anaesthetist As a result equations are a favourite question topic of examiners particularly in the viva examinations Many candidates answer these poorly losing valuable marks and floundering when they face what they perceive as nightmare questions This book provides a simple portable reference guide to all the equations that candidates may be asked about during their examinations The content is split into four sections physics pharmacology physiology and statistics Each equation is clearly explained derived where necessary and placed into a clinical context using a worked or clinically relevant example to demonstrate its use Units and relevant terms are given and where required clear concise diagrams have also been provided to simplify understanding Written by anaesthetic trainees this is an essential resource for preparation for the FRCA EDA and other anaesthetic examinations **Physics, Pharmacology and Physiology for Anaesthetists** Matthew E.
