Great Gatsby Advanced Placement Study Guide Literature:

Gulliver's Travels (MAXNotes Literature Guides) Stephen Stertz, 2013-01-01 REA's MAXnotes for Jonathan Swift's Gulliver's Travels MAXnotes offer a fresh look at masterpieces of literature presented in a lively and interesting fashion. Written by literary experts who currently teach the subject, MAXnotes will enhance your understanding and enjoyment of the work. MAXnotes are designed to stimulate independent thought about the literary work by raising various issues and thought-provoking ideas and questions. MAXnotes cover the essentials of what one should know about each work, including an overall summary, character lists, an explanation and discussion of the plot, the work's historical context, illustrations to convey the mood of the work, and a biography of the author. Each chapter is individually summarized and analyzed and has study questions and answers. **Modern Curriculum for Gifted and Advanced Academic Students** Todd A.

Kettler, 2021-09-03 Modern Curriculum for Gifted and Advanced Academic Students addresses the need for advanced curriculum design in an age of national standards and 21st century learning innovations. The text and its authors work from the assumption that the most advanced learners need a qualitatively different design of learning experiences in order to develop their potential into outstanding achievement, answering the question: How should we design learning experiences for our most advanced academic students in the foundational curriculum areas? This book provides the most contemporary thinking about how to design in-depth courses of study in the foundational curriculum areas with a high degree of complexity and advanced content. The book includes chapters articulating specific design components like creative thinking, critical thinking, and authentic research, but also subject-specific chapters in mathematics, language arts, science, and social studies to demonstrate application of those design components. **The Digital Future of English** Simone Murray, 2025-07-18 More than any other academic discipline, literary studies is the creation of print culture. How then can it thrive in the digital era? Early 1990s predictions of the book's imminent demise presented a simplistic either/or choice between the legacy of moribund print and triumphalist digital technology. Yet we have grown to experience the two media as complexly interdependent and even complementary. Clearly, digital does not kill print. But literary studies in the digital era cannot simply resume business as usual. It is urgently necessary to reconsider the discipline's founding assumptions in light of digital technology. The digital era prompts a rethinking of literary studies' object of study as well as its methods, theories, audiences, and pedagogical practices. What counts as literature necessarily shifts in an age of proliferating born-digital texts and do-it-yourself DIY online publication. Where should literary studies sit institutionally, and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis? Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect? Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book-loving publics has never been technologically easier? Finally, how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff

better connect with millennial age students Literary studies has been convulsed for decades by debates over electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology's impact on the underpinning tenets of the discipline Literary Media Studies is pitched at fellow literary scholars book historians media theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies digital future
