Green Business Model Innovation Business Case Study:

The Multi Business Model Innovation Approach Peter Lindgren, 2022-09-01 It is argued in most academic literature that Business Model BM is a general model for how any business runs or should be run it is the blueprint of the business. Conversely we argue that no business has just one BM one model on which it runs all its business or intends to run its business. In other words the BM can be used for as is and the to be businesses. However our research in contrast to the other BM frameworks indicates that businesses have more BMs both as is and to be BMs the multi business model approach. This was already theoretically indicated by Markides and Charitou in 2004 and again in the Casadesus Masanell and Ricart model of 2010 but sadly no one in the BM community has followed up on this since then. It could have made a breakthrough in our understanding of BMs Business Model Innovation BMI and Strategic BMI. The Multi Business Model Innovation Approach addresses the concerns in the BM community and in BMI practice to just focus on the ideation and conceptualization of BMs. BM canvassing innovating BM building blocks or BM dimensions when carrying out BMI so called blind business model innovation is not sufficient to run and understand a business today. BMs and BMI must address all the different levels in a business. All BMs are objects to BMI and should be used to maximize the performance and sustainability of the business. The core business and all levels BMs such as BM dimension components BM dimensions BM portfolio and Business Model Ecosystem BMES should all be considered for BMI. The book addresses and documents a gap in BM research and the BM community but also proposes a generic definition and language of a BM and BMI layers. The significance and importance of this work is related to significant and unexplored possibilities that BMI offers today and can offer tomorrow. When we thoroughly understand all levels dimensions and components of the business and its business models and we are able to communicate work and innovate with business models at all levels together then a next step in BM and BMI research and practice can be taken. It is proposed that any BMs are related to seven dimensions value proposition user and or customer value chain functions internal competence network relations and value formulae. It is further proposed that seven different levels of a BMI from the most detailed level the BM dimension component to the BM dimension BM BM portfolio business and the vertical and horizontal business model ecosystem layer and these can be objects to BMI. Conceptually the Business Model Cube was formed using the seven dimensions which could be used both in a 2D and a 3D version.

Inclusive Green Growth Calvin Atewamba, Dorothé Yong Ngondjeb, 2020-05-28 Fostering inclusive green growth in Africa means addressing existing and emerging development challenges while efficiently managing Africa's natural capital and building resilience to environmental social and economic risks. Although this new paradigm for development has the potential to create tremendous business opportunities there are also challenges. This book provides empirical evidence on the conditions for the emergence of green businesses in Africa. It includes 13 case studies which identify the determinants of small and medium size enterprises engagement in inclusive and sustainable growth in rural Africa and the factors that hinder eco innovation in

business and entrepreneurial activities Furthermore it discusses appropriate regulations and policies to stimulate the development of green business in Africa Offering insights into the relationship between eco innovation labor productivity and business competitiveness in rural Africa this book appeals to scholars policy makers and practitioners interested in a green economy for Africa *Handbook of Research on Business Model Innovation Through Disruption and Digitalization*

Rasmussen, Erik Stavnsager, Petersen, Nicolaj Hannesbo, 2023-02-27 Digital technologies are changing both the national and global business landscapes Digitalization within firms and industries and newcomers from other fields give new conditions for competition through new business models The Handbook of Research on Business Model Innovation Through Disruption and Digitalization discusses the aspects of the innovation of business models through disruption and digitalization It further includes chapters on theories and practices related to the overall theme of how business models are developed Covering topics such as agile networks interactive business models and managerial implications this major reference work is a dynamic resource for business leaders and executives IT managers human resource managers entrepreneurs government officials students and faculty of higher education librarians researchers and academicians Managing Green Business Model Transformations Axel Sommer, 2012-05-20 Environmental sustainability creates both tremendous business opportunities and formidable threats to established companies across virtually all industry sectors Yet many companies tackle the issue in a superficial or passive way rather than considering fundamental changes to their existing business models By ignoring the opportunities of Green Business Model Transformations companies exclude themselves from a large variety of potential means to create economic value In addition to ordinary product and process innovations they can change the rules of the game within an industry towards environmental sustainability Green Business Model Transformations however are challenging ventures New green business models with all their uncertainties and inherent complex systemic characteristics are difficult to design assess and implement successfully particularly in the context of established companies that often entail complex structures and considerable inertia As a result there is a great need for guidance in management practice This publication addresses this need with a general approach to Managing Green Business Model Transformations that is based on a broad theoretical foundation illustrated by many real world examples from various industry sectors

Fostering Global Entrepreneurship Through Business Model Innovation Gupta, Varun, 2023-12-21 In the wake of the pandemic the global business landscape has experienced unprecedented turbulence challenging startups and established enterprises equally This crisis has forced a profound reevaluation of traditional business models pushing entrepreneurs and business leaders to innovate like never before The urgency to adapt particularly for those seeking to expand globally has become a daunting task How can entrepreneurs navigate this new unpredictable terrain and find innovative pathways to success Fostering Global Entrepreneurship Through Business Model Innovation answers the pressing predicament faced by entrepreneurs startups and business leaders in this age of uncertainty This book has meticulously documented and analyzed

real world practices of startups that not only survived the pandemic but thrived through groundbreaking business model innovations *Green Business: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2019-02-01 The issues of sustainability and corporate social responsibility have become vital discussions in many industries within the public and private sectors In the business realm incorporating practices that serve the overall community and ecological wellbeing can also allow businesses to flourish economically and socially *Green Business Concepts Methodologies Tools and Applications* is a vital reference source for the latest research findings on the challenges and benefits of implementing sustainability into the core functions of contemporary enterprises focusing on how green approaches improve operations Highlighting a range of topics such as corporate sustainability green enterprises and circular economy this multi volume book is ideally designed for business executives business and marketing professionals business managers academicians and researchers actively involved in the business industry *Business Model Innovation* Annabeth Aagaard,2024-07-30 In the contemporary business landscape the imperative for innovative approaches to business model innovation BMI is more pronounced than ever especially given the pressing grand challenges technological disruptions digital transformation and pressing environmental and social concerns of our era The prevailing discourse in business model and BMI scholarship predominantly revolves around established frameworks and methodologies thereby not fully capturing the burgeoning opportunities and transformative forces redefining BMI s future trajectory This open access volume aims to fill the gap in scholarly discourse by offering a theory rich exploration into the innovative pathways of business model innovation Crafted for a global readership this text serves as an invaluable resource for academic institutions their faculty students and practitioners of business development within both expansive corporations and medium sized enterprises A key contribution of this edited book is the introduction of groundbreaking models and theoretical insights within the BMI domain identifying key research gaps and further research venues for junior and senior academics to pursue while enhancing the comprehension of how entities ranging from individual organizations to expansive networks can innovate execute and capitalize on BMI in the forthcoming landscape Furthermore this book elucidates the multifaceted nature of business model innovation across diverse contexts illustrating the myriad ways BMI can be conceptualized and operationalized to achieve varying objectives benefits and results contingent upon the specific scenario Lastly this volume is dedicated to invigorating and equipping both nascent startups and entrenched firms to seize emergent BMI opportunities fostering an environment where leveraging networks and platforms becomes a cornerstone for future business model innovation *Sustainable Education and Development—Green Buildings* Clinton Aigbavboa,Wellington Thwala,Joseph N. Mojekwu,Lawrence Atepor,Emmanuel Adinyira,Gabriel Nani,Emmanuel Bamfo-Agyei,2024-11-22 This book is Volume 2 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of green buildings Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2

4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID 19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019 Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings Remote Work and Sustainable Changes for the Future of Global Business Ali, Mohammed, 2021-06-25 There is a void of research and other academic materials to support stakeholders operating within

industry and the service sector with respect to their perceptions and experiences of remote work particularly in the context of global business sustainability and change management As more businesses consider remaining and maintaining a remote workforce it is of paramount importance that new research be conducted regarding the multifaceted area of remote work and sustainable change for global business Remote Work and Sustainable Changes for the Future of Global Business raises awareness of the multifaceted area of remote work in the context of sustainable change In particular it explores remote technology in an attempt to cope with the changing landscape of work environments amidst global change from a sociotechnical perspective This book provides insight into the challenges both national and international businesses face during a world crisis Covering topics such as crisis management the human cloud and virtual collaboration this book is essential to business managers project managers business clusters entrepreneurs higher education practitioners faculty and PhD researchers educational boards technology vendors and firms and academic researchers
