

A large offshore wind farm is visible in the background, with several white wind turbines standing in a blue sea under a clear sky. The turbines are arranged in a line, and their reflection is visible in the water. The overall scene is bright and clear, with a green shoreline visible in the distance.

Green Gone Wrong How Our Economy Is Undermining The Environmental Revolution:

Green Gone Wrong Heather Rogers, 2010-04-20 In *Green Gone Wrong* environmental writer Heather Rogers blasts through the marketing buzz of big corporations and asks a simple question Do today's much touted green products carbon offsets organic food biofuels and eco friendly cars and homes really work Implicit in efforts to go green is the promise that global warming can be stopped by swapping out dirty goods for clean ones But can earth friendly products really save the planet This far reaching riveting narrative explores how the most readily available solutions to environmental crisis may be disastrously off the mark Rogers travels the world tracking how the conversion from a petro to a green society affects the most fundamental aspects of life food shelter and transportation Reporting from some of the most remote places on earth Rogers uncovers shocking results that include massive clear cutting destruction of native ecosystems and grinding poverty Relying simply on market forces people with good intentions wanting to just do something to help the planet are left feeling confused and powerless *Green Gone Wrong* reveals a fuller story taking the reader into forests fields factories and boardrooms around the world to draw out the unintended consequences inherent obstacles and successes of eco friendly consumption What do the labels USDA Certified Organic and Fair Trade really mean on a vast South American export driven organic farm A superlow energy eco village in Germany's Black Forest demonstrates that green homes dramatically shrink energy use so why aren't we using this technology in America The decisions made in Detroit's executive suites have kept Americans driving gas guzzling automobiles for decades even as U.S. automakers have European models that clock twice the mpg Why won't they sell these cars domestically And what does carbon offsetting really mean when projects can so easily fail In one case thousands of trees planted in drought plagued Southern India withered and died releasing any CO₂ they were meant to neutralize Expertly reported this gripping exposé pieces together a global picture of what's happening in the name of today's environmentalism *Green Gone Wrong* speaks to anyone interested in climate change and the future of the natural world as well as those who want to act but are caught not knowing who or what to believe to protect the planet Rogers casts a sober eye on what's working and what's not fearlessly pushing ahead the debate over how to protect the planet *The approaching great transformation* Joel Magnuson, 2013-07-17 Explores how habitual ways of producing and consuming can be broken in a post fossil fuels world and outlines a philosophical blueprint for economic institutions centered on self reliance ecological permanence and creativity *The Limits of the Green Economy* Anneleen Kenis, Matthias Lievens, 2015-03-24 Projecting win win situations new economic opportunities green growth and innovative partnerships the green economy discourse has quickly gained centre stage in international environmental governance and policymaking Its underlying message is attractive and optimistic if the market can become the tool for tackling climate change and other major ecological crises the fight against these crises can also be the royal road to solving the problems of the market But how green is the green economy And how social or democratic can it be This book examines how the emergence of this new discourse has

fundamentally modified the terms of the environmental debate Interpreting the rise of green economy discourse as an attempt to re invent capitalism it unravels the different dimensions of the green economy and its limits from pricing carbon to emissions trading from sustainable consumption to technological innovation The book uses the innovative concept of post politics to provide a critical perspective on the way green economy discourse represents nature and society and their interaction and forecloses the imagination of alternative socio ecological possibilities As a way of repoliticising the debate the book advocates the construction of new political faultlines based on the demands for climate justice and democratic commons This book will be of interest to students and scholars of environmental politics political ecology human geography human ecology political theory philosophy and political economy Includes a foreword written by Erik Swyngedouw Professor of Geography Manchester University

Living Green Kathlyn Gay, 2012-03-29 What does living green mean For some it means making a commitment to reduce reuse and recycle every day For others it also means respecting and conserving our natural resources so they will be available in the future In *Living Green The Ultimate Teen Guide* readers learn why protecting the environment is such a crucial undertaking and why and how young adults should take up this important cause *Living Green* demonstrates how reckless indifference to our planet s needs jeopardizes not only plants and animals but the existence of mankind This volume addresses such concerns as leaving a low carbon footprint protecting wildlife saving natural resources conserving trees and gardens and fighting for environmental justice Most importantly *Living Green* explores the many ways that teens can make a difference in their homes communities and in the world at large While some of the teen efforts described here may be familiar the author also focuses on issues seldom addressed such as dumping toxic waste on poor and powerless communities The book includes quotes from green advocates and teens who consider themselves eco friendly as well as useful advice that will help young adults embrace a lifestyle that will positively affect generations to come

Getting to Green Frederic C. Rich, 2016-04-14 Regardless of your place on the political spectrum there is much to admire in this book which reminds us that the stewardship of nature is an obligation shared by all Americans U S Senator Angus S King Jr The Green movement in America has lost its way Pew polling reveals that the environment is one of the two things about which Republicans and Democrats disagree most Congress has not passed a landmark piece of environmental legislation for a quarter century As atmospheric CO₂ continues its relentless climb even environmental insiders have pronounced the death of environmentalism In *Getting to Green* Frederic C Rich argues that meaningful progress on urgent environmental issues can be made only on a bipartisan basis Rich reminds us of American conservation s conservative roots and of the bipartisan political consensus that had Republican congressmen voting for and Richard Nixon signing the most important environmental legislation of the 1970s He argues that faithfulness to conservative principles requires the GOP to support environmental protection while at the same time he criticizes the Green movement for having drifted too far to the left and too often appearing hostile to business and economic growth With a clear eyed understanding of

past failures and a realistic view of the future Getting to Green argues that progress on environmental issues is within reach The key is encouraging Greens and conservatives to work together in the space where their values overlap what the book calls Center Green Center Green takes as its model the hugely successful national land trust movement which has retained vigorous bipartisan support Rich s program is pragmatic and non ideological It is rooted in the way America is not in a utopian vision of what it could become It measures policy not by whether it is the optimum solution but by the two part test of whether it would make a meaningful contribution to an environmental problem and whether it is achievable politically Application of the Center Green approach moves us away from some of the harmful orthodoxies of mainstream environmentalism and results in practical and actionable positions on climate change energy policy and other crucial issues This is how we get to Green America Goes Green Kim Kennedy White,2012-11-12 This three volume encyclopedia explores the evolution of green ideology and eco friendly practices in contemporary American culture ranging from the creation of regional and national guidelines for green living to the publication of an increasing number of environmental blogs written from the layperson s perspective Evidence of humanity s detrimental impact on the environment is mounting As Americans we are confronted daily with news stories blogs and social media commentary about the necessity of practicing green behaviors to offset environmental damage This essential reference is a fascinating review of the issues surrounding green living including the impact of this lifestyle on Americans time and money the information needed to adhere to green principles in the 21st century and case studies and examples of successful implementation America Goes Green An Encyclopedia of Eco Friendly Culture in the United States examines this gripping topic through 3 volumes organized by A Z entries across 11 themes state by state essays grouped by region and references including primary source documents bibliography glossary and green resources This timely encyclopedia explores the development of an eco friendly culture in America and entries present the debates viewpoints and challenges of green living *Surviving Collapse* Christina Ergas,2021-07-30 As environmental crises loom *Surviving Collapse* makes an argument for radical changes in the ways in which people live to avoid a dystopian future To foster readers imagination Christina Ergas reveals real utopian stories that counter climate apocalypse narratives Two eco communities offer examples of alternative futures with small environmental footprints and more egalitarian social practices They model solutions to the interconnected problems of rising social inequalities and environmental degradation Each case engages in community oriented practices direct democracy and ecological agricultural forms that attend to whole ecosystems These practitioners recognize the value of whole biotic communities human and nonhuman and practice reciprocity **Motivating Change: Sustainable Design and Behaviour in the Built Environment** Robert Crocker,Steffen Lehmann,2013-07-24 Today s most pressing challenges require behaviour change at many levels from the city to the individual This book focuses on the collective influences that can be seen to shape change Exploring the underlying dimensions of behaviour change in terms of consumption media social

innovation and urban systems the essays in this book are from many disciplines including architecture urban design industrial design and engineering sociology psychology cultural studies waste management and public policy Aimed especially at designers and architects *Motivating Change* explores the diversity of current approaches to change and the multiple ways in which behaviour can be understood as an enactment of values and beliefs standards and habitual practices in daily life and more broadly in the urban environment

Bright Green Future: How Everyday Heroes Are Re-Imagining the Way We Feed, Power, and Build Our World Gregory Schwartz, Trevor Decker Cohen, 2021-04-12 *Bright Green Future* chronicles a renaissance at the edge of a crisis As climate change shifts our planet towards an uncertain future a movement of unlikely heroes are building a blueprint for a better world It's a world where clean power grows wealth for local communities resources regenerate themselves city planning is driven by the people and healthy soil is our greatest asset These changemakers have opened a gateway for ordinary people to begin imagining and building the bright future we deserve

Housing for Degrowth Anitra Nelson, François Schneider, 2018-09-03 *Degrowth* a type of postgrowth is becoming a strong political practical and cultural movement for downscaling and transforming societies beyond capitalist growth and non capitalist productivism to achieve global sustainability and satisfy everyone's basic needs This groundbreaking collection on housing for degrowth addresses key challenges of unaffordable unsustainable and anti social housing today including going beyond struggles for a right to the city to a right to metabolism advocating refurbishment versus demolition and revealing controversies within the degrowth movement on urbanisation decentralisation and open localism International case studies show how housing for degrowth is based on sufficiency and conviviality living a one planet lifestyle with a common ecological footprint This book explores environmental cultural and economic housing and planning issues from interdisciplinary perspectives such as urbanism ecological economics environmental justice housing studies and policy planning studies and policy sustainability studies political ecology social change and degrowth It will appeal to students and scholars across a wide range of disciplines

Managing Africa's Natural Resources K. Hanson, C. D'Alessandro, F. Owusu, 2014-09-23 The authors investigate well known concerns in natural resource management in Africa while focusing on the capacity dimension of the problems They examine dynamics of leadership governance criminality structural transformation as well as emerging issues such as green growth

The Green Good News T. Wilson Dickinson, 2019-12-11 When was the last time that we heard some good news For those tuned in to the ecological crisis and the daily chronicle of injustice the declaration of good news might seem synonymous with denial and avoidance The gospel of Jesus Christ helps us to face the suffering of the world and live in love and hope The only catch is it requires that we change It is only by losing our consumeristic profit seeking and isolated lives that we may save them The *Green Good News* finds a fresh take on the Gospels painting a picture of Jesus as a humorous and subversive teacher an organizer of alternative communities and food economies as a healer of bodies and relationships and as a prophet who sought to overturn an empire and restore a more just

and joyful way of life Christ teaches and incarnates a vision for sustainable life and provides practices that mark the path toward it By exploring this always inspiring sustainable gospel we can find ways to transform our lives communities and even creation

The Capitalism Papers Jerry Mander, 2013-05-01 In the vein of his bestseller *Four Arguments for the Elimination of Television* nationally recognized social critic Jerry Mander researches discusses and exposes the momentous and unsolvable environmental and social problem of capitalism Mander argues that capitalism is no longer a viable system What may have worked in 1900 is calamitous in 2010 Capitalism utterly dependent on never ending economic growth is an impossible absurdity on a finite planet with limited resources Climate change together with global food water and resource shortages are only the start Mander draws attention to capitalism's obsessive need to dominate and undermine democracy as well as to diminish social and economic equity Designed to operate free of morality the system promotes permanent war as a key economic strategy Worst of all the problems of capitalism are intrinsic to the form Many organizations are already anticipating the breakdown of the system and are working to define new hierarchies of democratic values that respect the carrying capacities of the planet

No, They Can't John Stossel, 2012-04-10 The government is not a neutral arbiter of truth It never has been It never will be Doubt everything John Stossel does A self-described skeptic he has dismantled society's sacred cows with unerring common sense Now he debunks the most sacred of them all our intuition and belief that government can solve our problems In *No They Can't* the New York Times bestselling author and Fox News commentator insists that we discard that idea of the perfect government left or right and retrain our brain to look only at the facts to rethink our lives as independent individuals and fast With characteristic tenacity John Stossel outlines and exposes the fallacies and facts of the most pressing issues of today's social and political climate and shows how our intuitions about them are frankly wrong the unreliable marriage between big business the media and unions the myth of tax breaks and the ignorance of their advocates why central planners never create more jobs and how government never really will why free trade works without government Interference federal regulations and the trouble they create for consumers the harm caused to the disabled by government protection of the disabled the problems social and economic generated by minimum wage laws the destructive daydreams of health insurance for everyone bad food vs good food and the government's intrusive unwelcome nanny sensibilities the dumbing down of public education and teachers unions how gun control actually increases crime and more myth busting realities of why the American people must wrest our lives back from a government stranglehold Stossel also reveals how his unyielding desire to educate the public with the truth caused an irreparable rift with ABC nobody wanted to hear the point by point facts of ObamaCare and why he left his long running stint for a new uncensored forum with Fox He lays out his ideas for education innovation as well and finally makes it perfectly clear why government action is the least effective and desirable fantasy to hang on to As Stossel says It's not about electing the right people It's about narrowing responsibilities No They Can't is an irrefutable first step toward that goal

Getting Past Capitalism Cynthia

Kaufman,2012-08-24 *Getting Past Capitalism* begins with a critique of the impacts of capitalism on human society and the environment It looks in new ways at what capitalism is and at how it is reproduced That investigation opens the door to fresh ways of looking at how to challenge it Cynthia Kaufman looks at some fundamental questions about how capitalism comes to look like a system that is unbeatable and how people come to have desires that work to reinforce capitalism Kaufman uses this analysis to develop ideas about how to challenge capitalism She argues that rather than looking for the fulcrum point in a system that will make it able to be overthrown we should try to understand what kinds of practices open more spaces for stopping the reproduction of capitalist processes and what kinds of structures need to be developed to make capitalism a less important part of our world *Getting Past Capitalism* includes a critique of capitalism and presentation of alternatives to capitalism many of which already exist It explores strategies for developing and strengthening those alternatives

Materials and Sustainable Development Michael F. Ashby,2015-01-19 This book from noted materials selection authority Mike Ashby provides a structure and framework for analyzing sustainable development and the role of materials in it The aim is to introduce ways of exploring sustainable development to readers in a way that avoids simplistic interpretations and approaches complexity in a systematic way There is no completely right answer to questions of sustainable development instead there is a thoughtful well researched response that recognizes concerns of stakeholders the conflicting priorities and the economic legal and social aspects of a technology as well as its environmental legacy The intent is not to offer solutions to sustainability challenges but rather to improve the quality of discussion and enable informed balanced debate Winner of a 2016 Most Promising New Textbook Award from the Textbook and Academic Authors Association Describes sustainable development in increasingly detailed progression from a broad overview to specific tools and methods Six chapter length case studies on such topics as biopolymers electric cars bamboo and lighting vividly illustrate the sustainable development process from a materials perspective Business and economic aspects are covered in chapters on corporate sustainability and the circular materials economy Support for course use includes online solutions manual and image bank [Routledge International Handbook of Sustainable Development](#) Michael Redclift,Delyse Springett,2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book s theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business

Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered

Environmental Management Chris Barrow, 2024-04-29 This comprehensively updated third edition explores the nature and role of environmental management and offers an introduction to this rapidly expanding and changing field It focuses on challenges and opportunities and core concepts including sustainable development The book is divided into five parts Part I Introduction to Environmental Management four introductory chapters cover the justification for environmental management its theory scope goals and scientific background Part II Practice explores environmental management in economics law and business and environmental management's relation with environmentalism international agreements and monitoring Part III Global Challenges and Opportunities examines resources challenges and opportunities both natural and human caused or human aggravated Part IV Responses to Global Challenges and Opportunities explores mitigation vulnerability resilience adaptation and how technology social change and politics affect responses to challenges Part V The Future the final chapter considers the way ahead for environmental management in the future With its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all It is an essential reference for undergraduates and postgraduates studying environmental management and sustainability and an important resource for many students on courses including environmental science environmental studies and human geography

The Idea of the Avant Garde Marc James Léger, 2019-10-15 The concept of the avant garde is highly contested whether one consigns it to history or claims it for present day or future uses The first volume of *The Idea of the Avant Garde And What It Means Today* provided a lively forum on the kinds of radical art theory and partisan practices that are possible in today's world of global art markets and creative industry entrepreneurialism This second volume presents the work of another 50 artists and writers exploring the diverse ways that avant gardism develops reflexive and experimental combinations of aesthetic and political praxis The manifest strategies temporalities and genealogies of avant garde art and politics are expressed through an international intergenerational and interdisciplinary convocation of ideas that covers the fields of film video architecture visual art art activism literature poetry theatre performance intermedia and music
