interest tending to examine only its role in transnational policy economic cycles and legal and political frameworks Border

studies has long been rooted in the US Mexico divide shifting the locus of that discussion north to the 49th parallel the

**That's Raven Talk** Mareike Neuhaus,2011 Annotation A reading strategy for orality in North American Indigenous literatures that is grounded in Indigenous linquistic traditions     **American Mythologies** William Blazek,Michael K. Glenday,2005-01-01 In its more than three decades of existence the discipline of American studies has been reliably unreliable its boundaries and assumptions forever shifting as it continuously repositions itself to better address the changing character of American life literature and culture American Mythologies is a challenging new look at the current reinvention of American studies a reinvention that has questioned the whole notion of what American let alone American studies means Essays in the collection range widely in considering these questions from the effect of Muhammad Ali on Norman Mailer s writings about boxing to the interactions of myth and memory in the fictions of Jayne Anne Phillips to the conflicted portrayal of the American West in Cormac McCarthy s novels Four essays in the collection focus on Native American authors including Leslie Marmon Silko and Gerald Vizenor while another considers Louise Erdrich s novels in the context of Ojibwa myth By bringing together perspectives on American studies from both Europe and America American Mythologies provides a clear picture of the current state of the discipline while pointing out fruitful directions for its future     The Post-Marked World

Sumit Chakrabarti,Krystyna Kujawińska Courtney,2013-07-29 It is a clich now to claim that we live in a post marked world and indeed the post isms are some of the most used and abused expressions in the language In a general sense the various kinds of post isms are regarded as a rejection of a prevailing number of cultural certainties on which our life in the so called Western world has been structured since the eighteenth century Engaging with the post isms can be regarded as both a philosophical and political endeavour which demonstrates among other things the instability of language meaning narrativity and generally any formal systems In the wake of such theoretical aporia this volume represents an investigation in the re thinking of the implications of the term post in current theoretical parlance Is there a politics always already embedded within the post Do we need the post any more Did we in the first place need it at all Is it possible to counter essentialism with the post prefix These are some of the questions the volume raises and explores by examining the post marked terms in the theoretical market The essays included in this volume address different and relevant issues related to the idea of the post and those that are representative of different parts of the globe Thus a reader of the volume will not only have a bird s eye view of the various disciplines where the concept of the post is used but also an eclectic range of contributions about issues that engage with different socio political dynamics from various parts of the world      **Genreflecting** Diana Tixier Herald,2000
