Green Oslo Per Gunnar Røe, 2016-04-22 As urban regions face the demand to decrease fossil fuel dependency many cities in the developing world are undertaking initiatives designed to create a greener city by aiming for a more sustainable form of urban development and to do so they need to evaluate existing modes of transportation and patterns of land use Focusing on Oslo an early leader in urban environmental policy making and a European green city award winner it argues that this evaluation must adopt and integrate two approaches firstly as a process of ecological modernization based on a combination of transit densification and mixed use development and secondly as an opportunity to reconsider the character and substance of the built environment as a reflection of natural values landscapes and natural resources of the wider region Environmental debate and concern is widespread in Oslo and this is reflected in its earlier planning decisions to leave intact large forest reserves its successful ecological restoration of the Oslo fjord the importance of outdoor culture among its residents the relatively progressive political agenda of Norway This book provides an opportunity for a critical assessment of the limitations and opportunities inherent in green Oslo and suggests the need for much broader integrative approaches It concludes by highlighting lessons which other cities might learn from Oslo

Urban Greening Techniques: An Introduction Chun Liang Tan, 2023-07-24 What is the best way to design with greenery What are the benefits of selecting one species of tree over another and placing it at Point A instead of Point B Will it cost more than the benefits it provides If you have ever asked these questions this book is for you Greenery is an integral part of the sustainable planning and design ethos Besides beautifying the environment it can also help alleviate adverse impacts of urbanisation such as the Urban Heat Island effect This book provides an introduction to the various technologies and techniques that facilitate the urban greening process Each chapter introduces the concept of urban greenery at different scales city precinct and plant as well as relevant methods and considerations for implementation Assessment frameworks are provided to maximise the benefits of greenery whilst minimising disservices associated with poor planning execution or maintenance of greenery or greenery systems Simple exercises and online resources are provided to illustrate how concepts from this book can be applied in practice This textbook is essential reading for anyone interested in urban greenery and how it can make a tangible positive impact on our built environment from students in the architecture landscape architecture and building construction disciplines to urban planners building owners designers and facility managers who wish to make more informed choices when incorporating greenery into the urban environment during the planning design construction and maintenance stages

Nordic Experiences of Sustainable Planning Sigríður Kristjánsdóttir, 2017-08-23 For well over a decade there has been a drive towards sustainability in planning throughout the Nordic countries But are these countries experiencing a paradigm shift in planning research and practice with regards to sustainability Or is the sustainability discourse leading them into an impasse in planning This book includes overviews of the planning systems in the five Nordic countries drawing attention to their increasing focus on sustainability A leading team of scholars from the fields of planning urban design architecture landscape economics real estate and tourism explore how the notion of sustainability has shaped planning research in the Nordic countries Case studies from Iceland Sweden Finland Norway and Denmark shed light on what lessons can be learned and some possible future developments By focusing on the actual settings and practices of local and regional planning activities it enables a discussion on the current state of planning for a more sustainable future This book will be valuable reading for students and academics interested in planning policy environmental policy architecture and urban design work

Suburbia in the 21st Century Paul Maginn, Katrin B. Anacker, 2022-03-24 The majority of the world's population now live in urban areas and the 21st century has been declared as the urban age However closer inspection of where people live in cities especially within so called advanced liberal democracies such as Australia the United Kingdom and the United States reveals that most people live in different types of suburban environments Drawing together scholars from across the globe this book provides a series of national regional and

local case studies from Australia Canada Finland France Ireland Spain the United Kingdom and the United States to exemplify the diverse and dynamic nature and importance of suburbia in 21st century urban studies city building and urbanism This book explores the evolving social physical and economic character of the suburbs and how structural processes market dynamics and government policies have shaped and transformed suburbia around the world It highlights the continuing importance of the suburbs and the suburban dream which lives on albeit under increasing challenges such as the global financial crisis structural racism and the Covid 19 pandemic which have given rise to various suburban nightmares

Ecocritical Aesthetics Peter Quigley, Scott Slovic, 2018-02-28 This lively collection of essays explores the vital role of beauty in the human experience of place interactions with other species and contemplation of our own embodied lives Devoting attention to themes such as global climate change animal subjectivity environmental justice and activism and human moral responsibility for the environment these contributions demonstrate that beauty is not only a meaningful dimension of our experience but also a powerful strategy for inspiring cultural transformation Taken as a whole they underscore the ongoing relevance of aesthetics to the ecocritical project and the concern for beauty that motivates effective social and political engagement

Creative Approaches to Planning and Local Development Abdelillah Hamdouch, Torill Nyseth, Christophe Demaziere, Anniken Førde, José Serrano, Nils Aarsæther, 2016-07-15 This book project highlights creative approaches to planning and local development The dynamic complexity diversity and fluidity which characterize contemporary society represent challenges for planning and development endeavours While research and policy work has extensively focused on large cities and on metropolitan regions there has been relatively little work on smaller places This book shows that if these new challenges affect all places and regions small and medium sized towns SMSTs are suffering many specific problems that call imperatively for the design and implementation of very imaginative creative approaches to planning and local development What could enhance creativity in local development and planning Is it possible to talk about creative capacity building at the level of a town that might release imaginative and innovative activities Under what local and non local conditions is creativity being initiated and flourishing What are the major obstacles and in what way can these be contained in order to safeguard pockets of creative action Interdisciplinary and with case studies from France Norway and other European countries this volume presents a wide range of approaches and territorial contexts of small cities and towns in which spatial dynamics and the consequences of the city region for urban planning theory and practice in Europe are highlighted with a special focus on the challenges for and understanding of planning and development of SMSTs It provides a significant body of critical comparative and contextual perspectives on the quest for urban sustainability and resilience in SMSTs therefore emphasizing collaborative and potentially innovative approaches that can be detected but also the shortcomings pitfalls and traps that can lie behind the approaches aimed at concerting ecological economic and socio cultural concerns and the discourses promoting them

Old Europe, New Suburbanization? Nicholas A.

Phelps, 2017-09-18 The youthful vigour of urbanization in North America has promulgated a dominant perspective on urban theory specifically on suburbs that establishes the United States as the norm against which all other contexts are measured. However much of the vocabulary surrounding the American experience isn't applicable to the wider world. Old Europe New Suburbanization takes us on a journey of rediscovery into some of Europe's oldest metropolises. The volume's contributors reveal the great variety of patterns and processes of urbanization that make Europe a fruitful ground for furthering the diversity of global suburbanisms. The effects of urban history found in such cities as Athens, London, Madrid, Montpellier and Sofia varies greatly due to the sheer variety of economic, industrial, land and expansionist policies at play on the continent. This collection highlights the varied historical and geographical manifestations that have shaped urban areas and provides evidence for new processes of suburbanization.

Active Landscape Photography Anne C Godfrey, 2023-04-28 Diverse Practices the third book in the Active Landscape Photography series presents a set of unique photographic examples for site specific investigations of landscape places. Contributed by authors across academia, practice and photography, each chapter serves as a rigorous discussion about photographic methods for the landscape and their underlying concepts. Chapters also serve as unique case studies about specific projects, places and landscape issues. Project sites include the Miller Garden, Olana, XX Miller Prize and the Philando Castile Peace Garden. Landscape places discussed include the archaeological landscapes of North Peru, watery littoral zones, the remote White Pass in Alaska, São Paulo and New York City's Chinatown. Photographic image making approaches include the use of lidar, repeat photography, collage, mapping, remote image capture, portraiture, image mining of internet sources, visual impact assessment, cameraless photography, transect walking and interviewing. These diverse practices demonstrate how photography when utilized through a set of specific critical methods becomes a rich process for investigating the landscape. Exploring this concept in relationship to specific contemporary sites and landscape issues reveals the intricacy and subtlety that exists when photography is used actively. Practitioners, academics, students and researchers will be inspired by the underlying concepts of these examples and come away with a better understanding about how to create their own rigorous photographic practices.

Architecture and the Forest Aesthetic Jana VanderGoot, 2017-12-22 Despite population trends toward urbanization, the forest continues to have a strong appeal to the human imagination and the human preference for forest over many other types of terrain is well documented. This book reimagines architecture and urbanism by allowing the forest to be a prominent consideration in the language of design, thus recognizing the forest as essential rather than just incidental to human well-being. In *Architecture and the Forest Aesthetic*, forest is a large scale urban construct that is far more extensive and nuanced than trees and shrubbery. The forest aesthetic opens designers to the forest as a model for an urban architecture of permeable floors, protective canopies, connected food chains, beneficial decomposition and resilient ecologies. Much can be learned about these features of the forest from the natural sciences, however, when they are given due consideration, technically and metaphorically, in the design of urban

habitat the places in which humans live become living forests What is present here in Architecture and the Forest Aesthetic is both a review of many ingenious ways in which the forest aesthetic has already been expressed in design and urbanism and an encouragement to further use the forest aesthetic in design language and design outcomes Case study projects featured include the Chilotan building craft of Southern Chile the yaki sugi of Japan the Biltmore Forest in the Southeastern United States the Australian capital city Canberra Bosco Verticale in Milan Italy the Beijing Olympic Forest Park in China and more

Landscape Architecture Theory Michael Murphy, 2016-12-13 For decades landscape architecture was driven solely by artistic sensibilities But in these times of global change the opportunity to reshape the world comes with a responsibility to consider how it can be resilient fostering health and vitality for humans and nature Landscape Architecture Theory re-examines the fundamentals of the field offering a new approach to landscape design Drawing on his extensive career in teaching and practice Michael Murphy begins with an examination of influences on landscape architecture social context contemporary values and the practicalities of working as a professional landscape architect He then delves into systems and procedural theory while making connections to ecosystem factors human factors utility aesthetics and the design process He concludes by showing how a strong theoretical understanding can be applied to practical every day decision making and design work to create more holistic sustainable and creative landscapes Students will take away a foundational understanding of the underpinnings of landscape architecture theory as well as how it can be applied to real world designs working professionals will find stimulating insights to infuse their projects with a greater sense of purpose Urban Planning in the Nordic World Ellen Braae, 2022 This volume on urban planning within the book series Nordic World outlines the preconditions the development the challenges and the actual appearances of the changing welfare city *Spaces in-between* Mark Luccarelli, Sigurd Bergmann, 2015-10-05 Spaces in between goes beyond the emphasis on externalities signalled by the term environment to address the isolation of modern technological culture from nature Solutions require more than an awareness of natural surroundings and human destructiveness We think in terms of the re-conceptualization re-design and re-negotiation of space The book is concerned with social practices belief systems urban designs the organization and representation of landscapes and modes of living These aspects of spatiality suggest how to conceive and practice the intermingling of nature and culture and how to develop public commitment to such practices In the process we show how concern for the environment as an aspect of space helps us to reconceive and reinterpret what it means to be human
