hundred years scholarly journals have been the prime mode of transport in communicating the scholarly research process. However, in the last few decades, a changing scenario has been witnessed in their form and format. OA is an innovative idea that attracts a fair amount of support and opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process. Some scholars are of the opinion that OA has led to a chaotic environment where anyone can publish anything. Scholarly Communication in Library and Information Services records in detail the impact by accessing the journals web site qualitatively and quantitatively in measuring the important elements such as articles, authors, countries, subjects, and cited references. Finally, the book calculates the impact factor using synchronous and asynchronous approaches. First ever study to extensively evaluate LIS Journals Web site qualitatively by using a newly developed set of criteria. LIS OA journals are also evaluated quantitatively. Counts citations of LIS OA articles in terms of formal citations by using Google Scholar. **BoldAds**
