A Bad Birdwatcher's Companion Simon Barnes, 2007 In this approach to ornithology self confessed bad birdwatcher Simon Barnes gives readers the confidence and motivation to get pleasure from one of the simplest cheapest hobbies there are watching birds without letting birdwatching get in the way **How to be a Bad Botanist** Simon Barnes, 2024-04-25 Chosen by WATERSTONES as one of their BEST NATURE WRITING BOOKS of 2024 Can you tell a tomato from a grape Lawn from an oak tree Then congratulations you are a botanist Self confessed bad birdwatcher Simon Barnes thought he knew nothing about plants He didn't object to them trees are interesting because birds perch in them plants are useful as they create habitats and birds live in habitats But while admiring the tenacity of some sea kale and yellow horned poppy to thrive on an inhospitable shingle beach he was struck by a truth it all begins with plants In this funny and inspiring book Simon Barnes tells the story of a lifelong relationship with plants and the realisation of the fact Taking us from thinking ourselves ignorant about plants to gently starting to observe seasons patterns and places Barnes guides us on a journey to better observing the beauty and diversity of the natural world Both a primer on how to appreciate the plants around us and an exploration on how they make our external and interior worlds How to be a Bad Botanist opens our eyes to the wonders around us Plants are everywhere in every part of your life and you know more than you think *The Joy of Birdwatching* Alan Davies, Ruth

Miller, 2015-02-12 This pocket sized miscellany packed with fascinating facts handy hints and captivating stories and quotes from the world of birds is perfect for anyone who knows the incomparable joy of birdwatching **Invasive and Introduced Plants and Animals** Ian D. Rotherham, Robert A. Lambert, 2012-12-06 There have been many well publicized cases of invasive species of plants and animals often introduced unintentionally but sometimes on purpose causing widespread

ecological havoc Examples of such alien invasions include pernicious weeds such as Japanese knotweed an introduced garden ornamental which can grow through concrete the water hyacinth which has choked tropical waterways and many introduced animals which have out competed and displaced local fauna This book addresses the broader context of invasive and exotic species in terms of the perceived threats and environmental concerns which surround alien species and ecological invasions As a result of unprecedented scales of environmental change combined with rapid globalisation the mixing of cultures and diversity and fears over biosecurity and bioterrorism the known impacts of particular invasions have been catastrophic However as several chapters show reactions to some exotic species and the justifications for interventions in certain situations including biological control by introduced natural enemies rest uncomfortably with social reactions to ethnic cleansing and persecution perpetrated across the globe The role of democracy in deciding and determining environmental policy is another emerging issue In an increasingly multicultural society this raises huge questions of ethics and choice At the same time in order to redress major ecological losses the science of reintroduction of native species has also come to the fore and is widely accepted by many in nature conservation However with questions of where and when and with what species or even species analogues reintroductions are acceptable the topic is hotly debated Again it is shown that many decisions are based on values and perceptions rather than objective science Including a wide range of case studies from around the world his book raises critical issues to stimulate a much wider debate

The Lively Place Stephen Kendrick, 2016-04-05 The story of one of the Boston area s most famous attractions the Mount Auburn Cemetery and how its founders and residents have influenced American culture When Mount Auburn Cemetery was founded in 1831 it revolutionized the way Americans mourned the dead by offering a peaceful space for contemplation This cemetery located not far from Harvard University was also a place that reflected and instilled an imperative to preserve and protect nature in a rapidly industrializing culture lessons that would influence the creation of Central Park the cemetery at Gettysburg and the National Parks system Even today this urban wildlife habitat and nationally recognized hotspot for migratory songbirds continues to connect visitors with nature and serves as a model for sustainable landscape practices Beyond Mount Auburn s prescient focus on conservation it also reflects the impact of Transcendentalism and the progressive spirit in American life seen in advances in science art and religion and in social reform movements In *The Lively Place* Stephen Kendrick celebrates this vital piece of our nation s history as he tells the story of Mount Auburn s founding its legacy and the many influential Americans interred there from religious leaders to abolitionists poets and reformers

Dr.),2009 First the authors explore how the scriptures were interpreted before the time of Darwin Part II presents essays on the real history of the Darwin controversies exploding the myths about this period The final chapter deals with the rise of creationism in its current social context **Birdmania** Bernd Brunner,2017-10-21 An exquisitely beautiful book These stories about birds are ultimately reflections on the curious nature of humanity itself Helen Macdonald author of H Is for Hawk There is no denying that many people are crazy for birds Packed with intriguing facts and exquisite and rare artwork Birdmania showcases an eclectic and fascinating selection of bird devotees who would do anything for their feathered friends In addition to well known enthusiasts such as Aristotle Charles Darwin and Helen Macdonald Brunner introduces readers to Karl Russ the pioneer of bird rooms who had difficulty renting lodgings when landlords realized who he was George Lupton a wealthy Yorkshire lawyer who commissioned the theft

of uniquely patterned eggs every year for twenty years from the same unfortunate female guillemot who never had a chance to raise a chick George Archibald who performed mating dances for an endangered whooping crane called Tex to encourage her to lay and Mervyn Shorthouse who posed as a wheelchair bound invalid to steal an estimated ten thousand eggs from the Natural History Museum in Tring As this book illustrates people who love birds whether they are amateurs or professionals are as captivating and varied as the birds that give flight to their dreams **Finding Your Wings** Burton S. Guttman,2008 Guttman provides a step by step workbook that guides readers through the challenges of bird watching This workbook is filled with quizzes and exercises that prepare the reader for birding and help beginners develop a sense of accomplishment and progress *This Luminous Coast* Jules Pretty,2014-12-02 Over the course of a year Jules Pretty walked along the shoreline of East Anglia in southeastern England eventually exploring four hundred miles on foot and another hundred miles by boat It is a coast and a culture that is about to be lost not yet perhaps but soon to rising tides and industrial sprawl This Luminous Coast takes the reader with him on his journey over land and water over sea walls of dried grass beside stretched fields of golden crops alongside white sails gliding across the intricate lacework of invisible creeks and estuaries under vast skies that are home to curlews and redshanks and the outpourings of skylarks East Anglia s coastline is as much a human landscape as it is a natural one and Pretty is equally perceptive about the region s cultural heritage and its industrial wild fishing villages and the modern seaside resorts family farms and oil refineries pleasure piers and concrete seawalls cozy pubs and military installations Through words and photographs Pretty interweaves stories of the land and sea with people past and present He is a passionate and sensitive guide to a region in transition under stress and perhaps even doomed as finely attuned to its history as he is to its unique sensory world **Birds in Their Habitats** Ian Fraser,2018-03 Everywhere we go there are birds and they all have mysteries to be unravelled These mysteries include the way they look from bizarre to apparently mundane why they live where they live and the things they do many of which are far too incredible ever to be imagined as fiction Birds in Their Habitats is a collection of stories and experiences which introduce fascinating aspects of birdlife ecology and behaviour Informed by a wealth of historical and contemporary research Ian Fraser takes the reader on a journey through four continents from places as unfamiliar as the Chonos Archipelago of southern Chile and the arid Sahel woodlands of northern Cameroon to those as familiar as a suburban backyard This is a book of discovery of birds and the places they live And with humour and personal insight it is a book about the sometimes strange world of the people who spend a life absorbed in birds British railway enthusiasm Ian Carter,2017-10-03 Now available in paperback this is the first academic book to study railway enthusiasts in Britain Far from a trivial topic the post war train spotting craze swept most boys and some girls into a passion for railways and for many ignited a lifetime s interest British railway enthusiasm traces this post war cohort and those which followed as they invigorated different sectors in the world of railway enthusiasm train spotting railway modelling collecting railway relics and then in response to the demise of main line steam traction

Britain's now huge preserved railway industry Today this industry finds itself riven by tensions between preserving a loved past which ever fewer people can remember and earning money from tourist visitors The widespread and enduring significance of railway enthusiasm will ensure that this groundbreaking text remains a key work in transport studies and will appeal to enthusiasts as much as to students and scholars of transport and cultural history The Earth Only Endures Jules Pretty, 2012-05-04 For most of human history we have lived our daily lives in a close relationship with the land Yet now for the first time more people are living in urban rather than rural areas bringing about an estrangement This book by acclaimed author Jules Pretty is fundamentally about our relationship with nature animals and places A series of interlinked essays leads readers on a voyage that weaves through the themes of connection and estrangement between humans and nature The journey shows how our modern lifestyles and economies would need six or eight Earths if the entire world's population adopted our profligate ways Pretty shows that we are rendering our own world inhospitable and so risk losing what it means to be human unless we make substantial changes Gaia threatens to become Grendel Ultimately however the book offers glimpses of an optimistic future for humanity in the very face of climate change and pending global environmental catastrophe
