Politics in Emotion Himadeep Muppidi,2014-09-25 The work focuses on a subaltern local sovereignty movement called Telangana in India Over the last ten years this movement has engaged in a massive political mobilization including strikes rallies work stoppages occupation of public spaces electoral contests 200 and more political suicides and media battles But interestingly enough notwithstanding a political mobilization that has brought day to day life to a halt on a number of occasions it has remained largely invisible in international media and global politics Fascinated by the social movement s international invisibility as well as the causes and conditions of its eruption around a city region that has become a showcase of new capitalist development Muppidi seeks to unpack this issue showing that this invisibility is not just intrinsically puzzling but also represents the operation of power on a global scale Investigating the conditions of invisibility in this instance can therefore tell us something important about the way global power works to produce visibility and invisibility in the 21st century world This book provides a unique resource for students of Postcolonialism International relations and South East Asian studies

A History of Ambiguity Anthony Ossa-Richardson,2019-05-14 Ever since it was first published in 1930 William Empson s *Seven Types of Ambiguity* has been perceived as a milestone in literary criticism far

from being an impediment to communication ambiguity now seemed an index of poetic richness and expressive power Little however has been written on the broader trajectory of Western thought about ambiguity before Empson as a result the nature of his innovation has been poorly understood A History of Ambiguity remedies this omission Starting with classical grammar and rhetoric and moving on to moral theology law biblical exegesis German philosophy and literary criticism Anthony Ossa Richardson explores the many ways in which readers and theorists posited denied conceptualised and argued over the existence of multiple meanings in texts between antiquity and the twentieth century This process took on a variety of interconnected forms from the Renaissance delight in the elegance of ambiguities in Horace through the extraordinary Catholic claim that Scripture could contain multiple literal and not just allegorical senses to the theory of dramatic irony developed in the nineteenth century a theory intertwined with discoveries of the double meanings in Greek tragedy Such narratives are not merely of antiquarian interest rather they provide an insight into the foundations of modern criticism revealing deep resonances between acts of interpretation in disparate eras and contexts A History of Ambiguity lays bare the long tradition of efforts to liberate language and even a poet s intention from the strictures of a single meaning Enjoying the Bible Matthew Mullins,2021-01-19 Many Christians view the Bible as an instruction manual While the Bible does provide instruction it can also captivate comfort delight shock and inspire In short it elicits emotion just like poetry By learning to read and love poetry says literature professor Matthew Mullins readers can increase their understanding of the biblical text and learn to love God s Word more Each chapter includes exercises and questions designed to help readers put the book s principles and practices into action **An Intertextual Commentary on Romans, Volume 2** Channing L. Crisler,2021-12-16 An Intertextual Commentary on Romans is an exhaustive treatment of the hundreds of Old Testament citations allusions and echoes embedded in Paul s most famous epistle As many scholars have acknowledged to understand Paul s engagement with Israel s Scriptures is to understand Romans Despite this acknowledgement there is a dearth of reference works in which the primary focus is how the Old Testament impacts Paul s argument from Romans 1 1 to 16 27 This four volume commentary aims to provide just such a reference The interplay between Romans and its vast sea of Old Testament pre texts produces unstated points of resonance that illuminate Paul s rhetorical argument from the letter s opening to its closing doxology Volume 2 examines the scriptural pre texts in Romans 5 1 8 39 While this portion of Romans contains only one full citation it is teeming with scriptural allusions and echoes that are critical to understanding Paul s argumentation Crisler leaves no intertextual stone unturned as he probes the subtext of one of the richest sections in the entire Pauline corpus From Paul s key transition in Romans 5 1 to his poetic flourish in 8 31 39 and everywhere in between Crisler explores the interplay between the apostle s endless engagement with Israel s Scriptures and his message to the Christians in Rome This volume contributes to the commentary s overarching aim which is to provide scholars interpreters and students with verse by verse analysis of how Israel s Scriptures impact almost every clause of Paul s most famous letter

Key Concepts in Social Work Practice Aidan Worsley, Tim Mann, Angela Olsen, Elizabeth Mason-Whitehead, 2012-11-12

This book is a quick and accessible reference guide to the key concepts that social work students and professionals need to understand to be effective. The authors place practice at the centre of the text and include a host of case examples to bring the concepts to life. Examining the essential topics of the social work curriculum, the concepts covered relate to practice, theory, policy, and personal challenges. Further reading is included in each entry so that the reader can explore what they have learned in more detail. This book will be an invaluable resource for social work students during their studies and on their practice placement. It will also be useful for qualified social workers who want to continue their professional education.

Innovative Quality Improvements in Operations Tomas Backström, Anders Fundin, Peter E. Johansson, 2017-07-13

This book examines current and emerging challenges in manufacturing related to the ideal of developing production processes with variability and agility on one level of the system combined with structures ensuring stability and robustness on another level, close to what by other scholars has been discussed in terms of continuous innovation. However, this ideal has proven to be difficult to achieve in practice and there is a need for enhanced and more sophisticated theoretical models dealing with the complexity surrounding organizational conditions to foster incremental as well as radical change in production systems and at the same time to ensure stability over time. As a theoretical frame of reference, a perspective on change where conflicting demands and conflicting activities, e.g., exploration and exploitation, are seen as intertwined and interdependent is used throughout the book. The ideal from this perspective is to make use of such conflicting forces and to develop the change dynamics by keeping them in the same social system, not to structurally separate them in different departments or different initiatives. The main purpose of the book is to address an increased need for quality improvement through innovation and disruptive change in production. Traditional theories and managerial models of production systems are developed with a focus on stability and improvement. There is a need for enhanced models to reach an ability to develop new future production systems. The goal of the book is to provide nuances and new perspectives giving more realistic models of the production system to be able to increase the change potentiality of the organization and thus the long-term competitiveness. Learning and organizational perspectives are in focus as enablers to increase the understanding of a production system as such. Long-term competitiveness through adaptability and the potential for radical improvement is of importance throughout the book. The use of dualities and the concept of ambidextrous organizations as a frame of understanding is the innovative strength for this area.

Branding Books Across the Ages Helleke van den Braber, Jeroen Dera, Jos Joosten, Maarten

Steenmeijer, 2021-04-20. As marketing specialists know all too well, our experience of products is prefigured by brands, trademarks that identify a product and differentiate it from its competitors. This process of branding has hitherto gained little academic discussion in the field of literary studies. Literary authors and the texts they produce though are constantly branded.

from the early modern period onwards they have been both the object and the initiator of a complex marketing process This book analyzes this branding process throughout the centuries focusing on the case of the Netherlands To what extent is our experience of Dutch literature prefigured by brands and what role does branding play when introducing European authors in the Dutch literary field or vice versa By answering these questions the volume seeks to show how literary scholars can account for the phenomenon of branding
